MARKET HIGHLIGHTS & ANALYSIS

Urad Trade Analysis

The Mumbai and other secondary markets remained weak as buying was low inspite of steady arrivals. The fears that rain might hamper the crop is also keeping the stockists away.

The slow and steady flow of Urad has started to come in Karnataka, Tamil Nadu and Latur district in Maharashtra.

Import of Urad is expected in the coming fortnight time, which will keep the market tight. But the Urad trade in the medium-term looks bullish due to festive demand coupled with low production.

Tur Trade Analysis

The Tur markets at Mumbai showed a weakness due to low demand in the market. However, the Delhi markets were steady due to low stock in the market and stockists are asking for the new imported Tur.

The stocks are on the lower side at most markets. So the market is absorbing away the import arrivals, which is creating a tight situation in the market.

It is expected that the production will be higher than last year in Tur. The market Demand of Dal is also not emerging significantly from the retail end and that will keep the market bearish for the time being.
