

MAJOR ACTIVITY HIGHLIGHTS

- Soymeal Domestic Market Prices Remained Stanstill.
- NCDEX April Contract Witnessed No Trading.

COMMENTARY DOMESTIC MARKET Soy meal

Subdued activity levels at the ports caused the prices to remain stable in the domestic markets. The positive movements in the CBOT soy meal futures couldn't lift the sentiments in the domestic markets. The soy meal prices at most of the spot markets remained steady to slightly improve today. The soy meal prices at ports slipped slightly in a thinly traded day. The CBOT soy meal futures climbed further high on Monday on technically inspired buying. The dry weather conditions prevailing in Argentina was the fundamental reason behind the jump in the CBOT soy meal future prices. The soy futures at NCDEX however witnessed no trading activity Monday.

The soy meal prices are witnessing steady improvement as the harvesting season is over and arrivals are depleting. The prices at Indore spot market again remained sleepy at Rs 8400-8600 per MT levels. The futures market however, witnessed no trading in February March and April contracts of soy meal. The soy meal prices saw some tapping at the ports and prices at Kandla port were Rs 9350 per MT as compared to Rs 8400 on the previous trading day. Though the activity levels still remained lower as the sellers were asking for higher prices of Rs 9500 per MT. At Vizag there were no sellers at the buyers price of Rs 9350. We are in the phase of the market where the demand is intermittent and haggling; at the same time the sellers are also not looking on a hurry and looking for the right prices. We expect the prices to remain steady to slightly improving. Soy meal export during December increased 62.28% to 492950 MT. The exports of soy meal rose to 1641775 MT (23.1%) during last 9 months (April-Dec). This growth was recorded the scenario of lower demand due to bird flu fears and other bearish factors like piling stock positions with the western counterparts. The Indian soy meal snatched demand on its attractive prices and good quality. Further the neighbouring countries found it easier to buy in small lots in the period of uncertainty in feed demand. The major destinations were, Japan (93,275 MT), China (84975 MT), Indonesia (81875MT), South Korea (74575 MT), Vietnam (73925 MT) and Thailand (31275 MT) in SE Asia and Jordan (27850MT) in Middle East.

Latest Soy Meal Vessel Report

Rape/ Mustard meal

Footsteps of fresh mustard seeds are being seen in the Rajasthan market. Hefty previous stock (mainly with NAFED) alongwith the forthcoming harvest season projects a bearish picture for mustard seed. Further, increased expected production this year i.e. 6.7 million tonnes as compared to the previous year's 6.25 million tonnes, supports the same thought. To some extent, Government buying (announced 20 lakh tonnes) of mustard seed at MSP Rs 1715 is likely to support the freefall of prices but looking at the crop size this effort of the government probably would not prove to be sufficient. So expect the mustard meal prices to stumble as the arrivals in mandis and crushing gets momentum during the coming time. Today there was no trading seen at Kandla port, as the buyers and sellers were standing apart. Today the Mustard oilcake was quoted in Morena Rs 4700 per MT.

Exports of Rapeseed meal during December 05 increased 17.39% to 47400 MT, however, the export for the period between April to December fell 5.8% to 441500 MT from 468800 MT during the same period of 2004. The main destinations were, South Korea (27850), Taiwan (9500MT), Thailand (6500MT) and Indonesia (2550MT).

Groundnut meal

There is nothing new input in the groundnut meal market as the arrivals, crushing and demand all seems to be steadied. The groundnut harvesting and arrivals in the southern market is at higher levels whereas the Gujarat markets are witnessing gradual fall in arrivals. As, at the moment oil prices are at lower levels due to good supply position of the oil due to higher crushing activity in soybeans. The arrivals of GN are diminishing in the major producing areas in Gujarat. The prices are almost steady. The prices will improve slightly if the prices of the seeds jump higher in lower supply scenario. GN meals (40%) were quoted stand still at Rs 6250 on credit and Rs 6000 on cash in Saurashtra.

GN Meal exports during December were 18000 MT according to reports of SEA of India. The export fell 9.7% to 95200 MT during April to December 2005 from 105525 MT during same period in 2004. The major destinations were china (14800 MT) and Indonesia (2550 MT).

INTERNATIONAL MARKET

CBOT Soymeal Futures Settle Higher

Soy future settled high at Chicago Boards of Trades on Monday. March Soybeans settled up 9.50 at \$5.9875/bushel, 7.50 cents off the high and 5.50 cents up from the low. May Soybeans settled up 9.75 cents at \$6.0950. This was 6.75 cents up from the low and 7 cents off the high. March Soybean Oil settled up \$1.8 at \$188.2/ton that was \$1.4 up from the low and \$2.3 off the high. March Soybean Oil finished up 0.15 cent at 22.2 cent/pound, 0.25 cent off the high and 0.05 cent up from the low. Fund buyers took the market high with effective buying coupled with the concern of hot and adverse weather forecast for Argentina in this week. It is expected that the temperature may rise up to 100 °F. Weekly export data from US came about 18.85 million bushels as compared to expected 22-30 million bushel.

According to the USDA weekly exports sales report, soybean sales of 521,900 MT were 59% below the previous week and 32% under the prior 4-week average. However, net sales of 189,100 MT of soybean meal were 20% above the week earlier and 2.1 times the prior 4-week average. The main buyers were El Salvador (59,700 MT), Cuba (35,900 MT), the Dominican Republic (30,500 MT), Mexico (30,300 MT), Canada (17,600 MT), and Colombia (12,600 MT). Exports of 104,600 MT were 46% below the previous week and 11% under the prior 4-week average. The major destinations were Japan (35,200 MT), Canada (27,700 MT), and Mexico (19,100 MT).
