based on higher yields and slightly higher harvested area. Soybean exports are reduced 70 million bushels to 950 million bushels primarily due to continuing weak sales to EU-25 and China. Export competition from South America has been unusually strong in recent months, reflecting large available supplies from record 2004/05 soybean crops. Soybean crush is raised this month due to a lower meal

extraction rate. Soybean stocks are projected at 505 million bushels, up 100 million bushels from last month. The U.S. season average soybean price range for 2005/06 is projected at \$5.10 to \$5.80 per bushel, up 10 cents on both ends of the range. Prices are raised based on a higher-than-expected season average price to date. Soybean oil prices are forecast at 20.5 to 22.5 cents per pound compared with 20.5 to 23.5 last month. Soybean meal prices are projected at \$165 to \$180 per short ton compared with \$155 to \$180 last month. Global oilseed production for 2005/06 is projected at a record 389.0 million

tons, up 2.0 million tons. Foreign production is projected at 292.5 million tons, up 0.6 million tons. Global sunflower seed production is projected at 29.9 million tons, up 0.7 million tons from last month. Russia's sunflower seed crop is raised 600,000 tons to 6.4 million tons due to higher yields. Other oilseed production changes include a increased rapeseed production for India and EU-25, and reduced palm oil production for Malaysia. Brazil soybean production for 2004/05 is raised 2 million tons to 53 million tons, a record despite drought in southern Brazil. Source:WASDE
