DOMESTIC & INTERNATIONAL NEWS

USDA: Weekly Export Sales Highlights

Weekly Export Sales Highlights of US Department of Agriculture is released on Thursday i.e. February 16, 2006. This summary is based on reports from exporters (for the period February 3-9, 2006).

Soybeans: Net sales of 529,600 MT were 2 percent above the previous week, but 23 percent under the prior 4-week average. Major increases for China (360,300 MT, including 220,000 MT switched from unknown destinations), Mexico (129,600 MT), Taiwan (97,300 MT), Indonesia (69,800 MT, including 62,000 MT switched from unknown destinations), and Costa Rica (28,200 MT) were partially offset by decreases for unknown destinations (198,000 MT). Exports of 988,200 MT were 47 percent above the week earlier and 48 percent over the prior 4-week average. The primary destination was China (531,300 MT), with smaller quantities to Taiwan (160,100 MT), Japan (100,300 MT), Mexico (94,100 MT), and Indonesia (68,600 MT).

Soybean Cake and Meal: Net sales of 152,900 MT were 15 percent above the week earlier, but 10 percent under the prior 4-week average. Major increases for the

Philippines (31,500 MT), Chile (27,500 MT), Mexico (22,500 MT), Colombia (14,300 MT), New Zealand (11,500 MT), unknown destinations (10,100 MT), and Japan (10,000 MT) were partially offset by decreases for Costa Rica (24,500 MT) and Turkey (11,700 MT). Exports of 157,300 MT slipped 23 percent from the previous week's marketing-year high, but were 3 percent above the prior 4-week average. The primary destinations were Mexico (35,100 MT), Chile (27,500 MT), Turkey (25,300 MT), Canada (12,700 MT), and Colombia (12,400 MT).

Soybean Oil: Net sales reductions of 3,300 MT resulted, as major increases for Canada (1,800 MT) were more than offset by decreases for Mexico (5,400 MT--switched to 2006/07). Sales of 5,400 MT for delivery in 2006/07 were all for Mexico. Exports of 900 MT--a marketing-year low--were mainly to Canada (400 MT), Mexico (200 MT), the Dominican Republic (100 MT), and the United Arab Emirates (100 MT).

World Agricultural Supply and Demand Estimates (WASDE) released by US Department of Agriculture on February 09, 2006.

This summary is based on above-mentioned report.

OILSEEDS: Projected U.S. soybean ending stocks for 2005/06 are increased 50 million bushels this month to a record 555 million bushels. Soybean exports are projected at 910 million bushels, down 40 million from last month, and 193 million below last year's record. Record Brazilian soybean exports for October through January have reduced demand for U.S. soybeans in EU-25 and China, and large new-crop supplies in South America are expected to further pressure U.S. exports in the second half of the marketing year. Domestic soybean meal and oil consumption are both reduced this month reflecting lower-than-expected disappearance during the first quarter of the marketing year. Consequently, U.S. soybean crush is reduced 10 million bushels to 1,720 million bushels. The U.S. season-

average soybean price range for 2005/06 is projected at \$5.20 to \$5.80 per bushel, up 10 cents on the bottom of the range. Soybean meal and oil price projections are unchanged from last month at 20.5 to 22.5 cents per pound and \$165 to \$180 per short ton, respectively. Global oilseed production for 2005/06 is projected at a record 389.3 million tons, up 0.3 million tons from last month. Small reductions for soybeans and sunflower seeds are more than offset by increased cottonseed production in China. Global oilseed trade and crush are reduced this month, and global oilseed stocks are projected higher, mainly due to increased U.S. soybean stocks. Global oilseed stocks are projected at a record 63 million tons, 20 percent above year-earlier levels.

Malaysia: February Palm Oil Exports Up by 19.41 %

Malaysian's palm oil exports in February 1-15, 2006 totalled 552999 metric tonnes as against 463128 metric tonnes of January 1-15, 2006, it is up by 19.41 per cent.

Details of major items, which is estimated by SGS are as follows: Table 1 shows that RBD Palm Olein and Crude Palm Oil export sales are increased by 17.01 and 97.91 per

cent respectively during the period of February 1-15, 2006 as compared to January 1-15, 2006. On the other hand, Table 1 shows that 30.85 and 2.73 per cent during same period declines the export sales of RBD Palm Oil and RBD Palm Stearin.

Table1: Shows the details of the major items in SGS estimate

(Unit: MT)

Items	February 1-15 2006	January 1-15, 2006	Change %
RBD Palm Olein	248260	212177	+17.01
RBD Palm Oil	50715	73341	-30.85
RBD Palm Stearin	28062	28849	-2.73
Crude Palm Oil	88565	44750	+97.91

Source: SGS (Malaysia) Bhd.

Major importer countries/continents of Malaysian palm oil

Estimates of export data released by Cargo Surveyor SGS for the period of February 1-15, 2006. The major importers of Malaysian palm oil were as follows:

1. European Union 2. China 3. USA 4. India and 5. Pakistan

Country wise brief highlights of imports are as follows: Table 2 shows that import of Malaysian palm oil from USA and India declined by 46.50 and 54.70 per cent respectively during the period of February 1-15, 2006 as compared to

January 1-15, 2006. However, Import of Malaysian palm oil from European Union, China and Pakistan increased by 165.14, 7.62 and 23.27 per cent during the same period.

Table 2: Shows the major import destination of Malaysian palm oil:

(Unit: MT)

Countries/Continents	February 1-15 2006	January 1-15, 2006	Change %
European Union	159123	60015	+165.14
China	114204	106122	+7.62
United States	18349	34300	-46.50
India	9430	20815	-54.70
Pakistan	30200	24500	+23.27

GOI: Raises Base Import Prices on Edible Oils

Government of India raised base import prices on edible oil on February 15, 2006. Government of India raised base import prices on Crude Soybean Oil at \$501/ton (+17) from \$ 484/ton, Crude Palm Oil at \$ 426 /ton (+14) from \$ 412/ton, RDB Palm Oil at \$ 441/ton (+14) from \$ 427/ton, Crude Palmolein at \$ 448/ton (+14) from \$ 434/ton, RBD Palmolein at \$ 451/ton (+14) from \$ 437/ton, Other palm oil

at \$ 434/ton (+14) from \$ 420/ton and Other palmolein at \$ 450/ton (+14) from \$ 436/ton. Base import prices are used by the government of India to calculate import duties regardless of the actual market prices of the commodities. Revised tariff values of various edible oils as shown in the table below.

Table: Government of India has revised base import prices:

Commodities	Current Tariff Rate	Previous Tariff Rate	Change (US \$)
Crude Soybean Oils	501	484	+17
CPO	426	412	+14
RBD Palm Oil	441	427	+14
Crude Palm Olein	448	434	+14
RBD Palm Olein	451	437	+14
Other Palm Oil	434	420	+14
Other Palmolein	450	436	+14

The revised value is effective from today i.e., Feb 15, 2006.

Ministry of Agriculture: Proposed to Cabinet for Higher tariff on Checks of Soy Oil Import

India's agriculture ministry has proposed a hike in the import duty on palm oils and checks on soyoil imports for a better management of mustard seeds and edible oils prices according to government official. The ministry has suggested that an agency could be set up to regulate imports of soyoil made from genetically modified soybeans and to differentiate them from non-genetically modified ones. The proposals have been mooted in the wake of local rapeseed prices prevailing below the government-set intervention price of Rs. 1715/quintal. This compels the government to purchase large volumes of rapeseeds at the intervention price despite a paucity of funds and storage space. If the imports of edible oils are regulated through higher tariffs and non-tariff controls it could have a psychological upward impact on prices and the government may not have to procure huge quantities of rapeseeds. In 2005, government purchased a record 2.09 million tons of rapeseeds, of which 1.67 million tons are still lying in the warehouses. It caused a huge burden on the exchequer of

around Rs. 35.0 billion. According to the senior official, these are suggestions, and the views of other ministries such as Food and Public Distribution, Commerce, Consumer Affairs and Finance are also crucial before a final decision is taken. The finance ministry, if any, can only make changes in tariffs. India currently imposes an 80% duty on crude palm oil and a 90% duty on refined bleached and deodorized palm olein. Under World Trade Organization rules, these tariffs can be increased up to 300%. The import duty on soyoil is 45% and cannot be increased above this level under WTO rules. The issue of genetically modified soyoil needs reconsideration, as when the WTO ceiling was fixed there was no differentiation between soyoil made from genetically and non-genetically modified seeds. However, it remains it is to be worked out how to distinguished between the two. In India, soyoil is currently cheaper than other oils and its crude imports rose in the marketing year to October 2005 to 2.0 million tons from 890,695 tons in 2003-04.

DOMESTIC MARKET ANALYSIS

Palm oil

Palm oil prices at physical market remained steady in the beginning of this week and slightly improved later on due to hike in base import prices on palm oil by GOI and lower import of palm oil in India. Malaysian palm oil is imported by India totaled 9430 metric ton during February 1-15 as against 20815 metric ton from January 1-15, 2006, down by 54.70 per cent. A Cargo surveyor SGS (Malaysia) Bhd. released his export estimates on Wednesday i.e. February 15, it revealed in his export estimates that Malaysia's palm oil exports during February 1-15 totaled 552999 metric tons as against 463128 metric ton from January 1-15, it is up by 19.41 per cent. Another surveyor Intertek Agri services

revealed in his export estimates that Malaysia's palm oil export totaled in February 1-15 totaled 547950 metric ton, up 14.54 per cent from 478399 in January 1-15. The annual price outlook conference organized by Bursa Malaysia Derivatives will be held in Kuala Lumpur Feb. 22-24. Market sentiments was positive due to forecast by prominent analysts about the bullish views from the speaker of above mentioned conference on the accounts of higher demands of bio-diesel. The above-mentioned factors brought positive impact on its prices. Palm oil prices are expected to move range bound with positive sentiments.

Soy oil

Domestic soy oil prices went up sharply during this week in most markets. NCDEX March soy oil future prices jumped sharply in the beginning of this week due to talk in the markets that GOI is planning to hike base import prices on soybean oil to restrict soybean oil import in the interest of domestic mustard oil in this budget, but GOI raises base import prices on crude soybean oil in mid of this week i.e.

February 15, 2006, at \$501/ton on crude soybean oil (+\$17/ton) from \$484/ton. The above-mentioned factors brought positive impact on its prices on future as well as spot markets. Arrivals of soybeans per day during this week were in range of 85000-95000 lakh bags (1 bags= 85 kg) in major markets of India. Soy oil prices are expected to move range bound with positive sentiments in next week.

Rape/Mustard Oil

Mustard oil prices on spot market were range bound during this week. Harvesting of mustard crop started in Kota region, Rajasthan and Neemuch area in Madhya Pradesh. Daily arrivals of new mustard seeds are about 7000-12000 bags in Kota only, however it was 1200-1500 bags in last week. Total arrivals of mustard seeds were about 80,000 bags in Rajasthan on Saturday. Harvesting of mustard crop

in Shri Ganganagar area is expected to begin from first week of March. Despite more supply of mustard seeds, mustard oil prices are likely stable only due to higher prices of soy oil on future market as well as spot markets. Lower import of palm and soybean oil brought positive impact on mustard oil prices. Mustard oil prices are expected to move range bound with positive sentiments in next week.

Groundnut oil

Groundnut oil prices on domestic spot markets range bound with positive sentiments in most of markets during this week. Groundnut oil prices followed the soy oil prices on spot markets. The arrivals of groundnut seeds are declined slightly in Gujarat mandi during this week. It is expected to improve groundnut oil prices slightly in most

markets during next week due to low supply of groundnut seeds and expected to higher prices of soy oil on spot markets.

Sunflower Oil

Spot market prices of sunflower oil in most of the markets improved slightly during this week due to improvement of vayda bazaar and soybean oil at spot markets. Prices of all edible oil improved during this week due hike base import prices on palm oil and soy oil and lower import of edible oil

as compared to previous year. CIF on sunflowers are increased during this week from \$ 550/metric ton to \$ 574 metric ton. Sunflower oil prices are expected to move range bound in next week.

Cotton Refine Oil

Cotton oil prices on physical market moved up sharply during this week in most of the markets amidst positive market sentiments of edible oil. Cotton oil prices climbed behind the soy oil prices in most of the markets during this

week. Another reason was that the lower arrivals of cottonseeds in Madhya Pradesh brought positive impact on its prices. Cotton oil prices are expected to move range bound with positive sentiments in next week.

INTERNATIONAL MARKET WEEKLY HIGHLIGHTS

Palm oil Market Malaysia

Crude palm oil futures at Bursa Malaysia Derivatives settled lower on Friday. The benchmark May contract settled at MYR1488 per metric ton, down MYR1 from previous trading day. A Cargo surveyor SGS (Malaysia) Bhd. released his export estimates on Wednesday i.e. February 15, it revealed in his export estimates that Malaysia's palm oil exports during February 1-15 totaled 552999 metric tons as against 463128 metric ton from January 1-15, it is up by 19.41 per cent. Another surveyor Intertek Agri services revealed in his export estimates that Malaysia's palm oil export totaled in February 1-15 totaled 547950 metric ton, up 14.54 per cent from 478399 in

January 1-15. The annual price outlook conference organized by Bursa Malaysia Derivatives will be held in Kuala Lumpur Feb. 22-24. Market sentiments was positive due to forecast by prominent analysts about the bullish views from the speaker of above mentioned conference on the accounts of higher demands of bio-diesel. Monday, cargo surveyors SGS (Malaysia) Bhd and Intertek Agri Services are due to release Feb. 1-20 Malaysian palm oil export estimates. Traders said market expectations are for exports of 720,000-750,000 tons, up from 650,000-670,000 in the Jan. 1-20 period.

Soybean Market United States

Soybean oil futures prices on Chicago Board of Trade range bound with mixed sentiments during this week. Soybean oil futures prices were weak in beginning of this week due to hefty stock of US soy oil, favourable weather for soybean crop in South America and Speculative selling pressure pull down the market. On the other hand, March CBOT soy oil prices improved sharply from mid of this week due to dry weather forecast for South Americas and it may bring negative impact on its yield and production of new crop. March Soybean Oil settled up 0.3 cents at 22.57

cents/pound, 0.03 cents off the high and 0.44 cents up from the low. Strong cash basis level on advent of harvesting of Brazil crop helped to support the market up. There is still talk of possible yield and crop loss for Argentina due to hot and dry weather forecast for next week. Weekly US export sales for Oil export sales remain on the lower reaches at 2,100 tonnes as compared to trade expectations between 0-10,000. March soybeans oil prices moved in range of 21.14 to 22.60 cents/pounds during this week. CBOT soy oil prices are expected to move range bound in next week.

South American Soybean Market:

South American soybean futures settled high on Friday. March South American soybeans settled 3 cents higher at \$6.40/bushel and managed to reach highest level since January 5th. Taiwan bought 40,000-60,000 tonnes of Brazil soybeans overnight and as soon the harvesting will start, world buyers are expected to shift demand to South America. The Argentina weather forecast concern helped to provide some support to the market. Other market looks

supportive which further added to its bullish tone. Funds were noted buyers of nearly 2,000 soybeans, 1,000 meals and 2,500 oil showing positive sentiments. Due to possible oil crisis, the prices of oil were high which indirectly helped to boost the market up for soybean. Rumours about China purchasing few cargoes of US soybeans previous day further helped the market up.

NCDEX Soy Futures Markets

NCDEX March contract soy oil prices went up sharply during this week. NCDEX March soy oil futures prices increased in the beginning of this week due to talk in the markets that GOI is planning to hike base import prices on soybean oil to restrict soybean oil import in the interest of domestic mustard oil in this budget, but GOI raises base import prices on crude soybean oil in mid of this week i.e. February 15, 2006, at \$501/ton on crude soybean oil (+\$17/ton) from \$484/ton. NCDEX March soy oil futures prices ends up sharply higher on Saturday. NCDEX March soy oil contract prices settled higher Rs 3.35 at Rs 382.00/10 Kg, it was Rs 1.80 off the high and Rs 2.75 up from the low. March oil prices moved in range of Rs 366.50 to Rs 383.80 during this week. The above-mentioned factors brought positive impact on its prices. Soy oil prices are expected to move range bound with positive sentiments in next week.

WEEKLY WEATHER WATCH

ALL INDIA WEATHER FORECAST VALID FOR NEXT 5 DAYS

Meteorological Analysis

Last week's western disturbance as an upper air system over Jammu & Kashmir and adjoining area moved away eastwards on 9th evening. The induced cyclonic circulation over Rajasthan also became less marked on 9th.

An upper air cyclonic circulation extending upto 1.5 km above sea level lay over Assam & Meghalaya on 9th. It persisted till 11th and became less marked on 12th.

A fresh western disturbance lay over north Pakistan & neighbourhood on 12th. It moved in a east-northeasterly direction and lay over Jammu & Kashmir, Himachal Pradesh and adjoining north Punjab on 13th and 14th. It further moved eastwards and was over Himachal Pradesh & neighbourhood on 15th.

An induced upper air cyclonic circulation formed over central Pakistan & neighbourhood on 12th. It persisted till 13th and became less marked on 14th.

Rainfall

Light to Moderate rain/snow occurred at many places over Jammu & Kashmir on 15th and at a few places on 13th and 14th.

Light to moderate rain/thundershowers occurred at a few places over Arunachal Pradesh and Assam and isolated light rain/thundershowers over Sub-Himalayan West Bengal and Nicobar islands on 14th and 15th.

Temperatures

Day temperatures remained 4-6° C above normal over many parts of northwest India and northeastern states during first half of the week. They increased during second half and were 6-8°C above normal by the end of the week over northwest India, Gangetic plains and adjoining central India. They were 2-4°C above normal over rest parts of the country outside interior south peninsula where they were 1-2°C below normal on many days of the week.
