

MAJOR ACTIVITY HIGHLIGHTS

- **Soymeal Domestic Market Prices Remained Steady.**
- **NCDEX Soymeal April Contract Settled Lower.**

COMMENTARY DOMESTIC MARKET Soy meal

No fresh input in the market kept the prices calm. The soymeal prices at domestic spot markets remained steady today as there were no fresh inputs from domestic as well as international markets. The prices at ports improved slightly and the market is waiting for the Chinese buying as the Chinese holiday is ending this Sunday. The soy futures at NCDEX were dictated by bullish sentiments in the CBOT soymeal futures on Friday. CBOT soymeal futures jumped on bullish weekly USDA export sales report on the last trading day of the week.

The prices at Indore spot market remained steady and traded in the range of Rs 8500-8700 per MT levels. April soymeal at NCDEX shed half of its yesterday's gains and slipped to Rs 8750 per MT levels, as compared to Rs 8900 per Mt levels on Friday. The prices corrected the over jump on Friday. Ports witnessed not much activity on the last trading day of the week. The prices at Kandla port remained stationary at Rs 9200 per MT. Though the activity levels still remained lower as the sellers were asking for higher prices of Rs 9400 per MT. If Chinese buying comes on Monday when they will come after holiday, some improvement in the prices can be seen. We are in the phase of the market where the demand is intermittent and haggling; at the same time the sellers are also not looking on a hurry and looking for the right prices. We expect the prices to remain steady to slightly bearish.

Soymeal export during December increased 62.28% to 492950 MT. The exports of soymeal rose to 1641775 MT (23.1%) during last 9 months (April-Dec). This growth was recorded the scenario of lower demand due to bird flu fears and other bearish factors like piling stock positions with the western counterparts. The Indian soymeal snatched demand on its attractive prices and good quality. Further the neighbouring countries found it easier to buy in small lots in the period of uncertainty in feed demand. The major destinations were, Japan (93,275 MT), China (84975 MT), Indonesia (81875MT), South Korea (74575 MT), Vietnam (73925 MT) and Thailand (31275 MT) in SE Asia and Jordan (27850MT) in Middle East.

Latest Soy Meal Vessel Report

Mumbai Port is loading 8,000 MT of SBM on the vessel 'Asian Robin'. Sai Freight agents is handling the vessel.

Rape/ Mustard meal

Footsteps of fresh mustard seeds are being seen in the Rajasthan market. Hefty previous stock (mainly with NAFED) alongwith the forthcoming harvest season projects a bearish picture for mustard seed. Further, increased expected production this year i.e. 6.7 million tonnes as compared to the previous year's 6.25 million tonnes, supports the same thought. To some extent, Government buying (announced 20 lakh tonnes) of mustard seed at MSP Rs 1715 is likely to support the freefall of prices but looking at the crop size this effort of the government probably would not prove to be sufficient. So expect the mustard meal prices to stumble as the arrivals in mandis and crushing gets momentum during the coming time. Today there was no trading seen at Kandla port, as the buyers and sellers were standing apart. Today the Mustard oilcake was quoted in Morena Rs 4600 per MT.

Exports of Rapeseed meal during December 05 increased 17.39% to 47400 MT, however, the export for the period between April to December fell 5.8% to 441500 MT from 468800 MT during the same period of 2004. The main destinations were, South Korea (27850), Taiwan (9500MT), Thailand (6500MT) and Indonesia (2550MT).

Groundnut meal

There is nothing new input in the groundnut meal market as the arrivals, crushing and demand all seems to be steadied. The groundnut harvesting and arrivals in the southern market is at higher levels whereas the Gujarat markets are witnessing gradual fall in arrivals. As, at the moment oil prices are at lower levels due to good supply position of the oil due to higher crushing activity in soybeans. The arrivals of GN are diminishing in the major producing areas in Gujarat. The prices are almost steady. The prices will improve slightly if the prices of the seeds jump higher in lower supply scenario. GN meals (40%) were slightly improved at Rs 6300 on credit and Rs 6050 per MT on cash in Saurashtra.

GN Meal exports during December were 18000 MT according to reports of SEA of India. The export fell 9.7% to 95200 MT during April to December 2005 from 105525 MT during same period in 2004. The major destinations were china (14800 MT) and Indonesia (2550 MT).

INTERNATIONAL MARKET

CBOT Soymeal Futures Settle Higher

Soy future settled high at Chicago Boards of Trades on Friday. March Soybeans settled up 10.75 cents at \$5.9475/bushel off the high and 13.75 cents up from the low. May Soybeans closed up 10.75 cents at \$6.07 cents, which was 14 cents up from the low and 3 cents off the high. March Soymeal settled up \$2.1 at \$184.0/ton which was \$3.1 up from the low and \$2.0 off the high. March Soybean Oil settled up 0.71 cents at 22.66 cents/pound, 0.02 cents off the high and 0.73 cents up from the low. Strength in the market was driven by strong and effective fund buying which helped to boost up. Though, there is a shower in recent past but the recent weekly forecast reveals the chances of hoy dry spell again supporting the reason for strength in the market.

According to the USDA weekly exports sales report net sales of soybeans of 446,600 MT were 14 percent below the previous week and 34 percent under the prior 4-week average. Soy Meal net sales of 197,900 MT were 5 percent above the week earlier and 71 percent over the prior 4-week average. Major increases for unknown destinations (64,000 MT), Mexico (51,000 MT), the Dominican Republic (38,200 MT), Turkey (23,000 MT), and Canada (14,100 MT) were partially offset by decreases for Egypt (8,000 MT) and Algeria (5,000 MT). Exports of 109,300 MT were 4 percent above the previous week, but 7 percent under the prior 4-week average. The primary destinations were Mexico (35,900 MT), Canada (20,100 MT), Guatemala (12,200 MT), Colombia (10,100 MT), the Dominican Republic (8,900 MT), and Turkey (8,100 MT).

WEATHER WATCH: (04.02.06)

Chief Features

As no significant weather system is affecting the country., largely dry weather conditions continue to prevail over most parts of the country. This scenario is likely to continue for another 2-3 days. However, due to formation of an upper air cyclonic circulation extending upto 3.6 km a.s.l over northeastern states and neighbourhood, isolated rainfall is likely over the region and Sub-Himalayan West Bengal & Sikkim. Isolated rainfall is also likely over Tamil Nadu and Kerala. Day & night temperatures are 4-5°C above normal over many parts of north and central India. However, the temperatures of northwest India are likely to fall by 2-3°C during next 2 days.

Forecast valid for next 72 hours

NORTH: Weather will be mainly dry over the region.

EAST: Isolated rain/thundershowers likely over northeastern States and Sub- Himalayan West Bengal & Sikkim. Weather will be mainly dry over the rest region.

SOUTH: Isolated rain/thundershowers are likely over Nicobar island, Tamil Nadu and Kerala. Weather will be Mainly dry in the rest region.

WEST: Weather will be mainly dry over the region.

Outlook for subsequent two days based on NCMRWF and other numerical weather products :

Isolated rain/snow is likely over Western Himalayas. However, largely dry weather conditions are likely to continue over most other parts of the country.
