DOMESTIC & INTERNATIONAL NEWS

USDA: Weekly Export Sales Highlights

Weekly Export Sales Highlights of US Department of Agriculture is released on February 09, 2006. This summary is based on reports from exporters (for the period Jan 27 to Feb 2, 2006).

Soybeans: Net sales of 518,200 MT were 16 percent above the previous week, but 23 percent under the prior 4-week average. Major increases for China (251,400 MT, including 124,000 MT switched from unknown destinations), Mexico (100,900 MT), the Netherlands (67,700 MT, including 60,000 MT switched from unknown destinations), Taiwan (57,200 MT), Indonesia (43,000 MT), and Malaysia (41,400 MT, including 24,000 MT switched from unknown destinations) were partially offset by decreases for unknown destinations (96,000 MT) and Denmark (13,600 MT). Sales of 44,100 MT for delivery in 2006/07 were reported to Japan. Exports of 673,800 MT were 19 percent above the week earlier and 1 percent over the prior 4-week average. The primary destination was China (414,400 MT), with smaller quantities to the Netherlands (67,700 MT), Mexico (46,100 MT), Syria (35,600 MT), Japan (31,500 MT), and Malaysia (24,400 MT).

Soybean Cake and Meal: Net sales of 133,300 MT were one-third below the week earlier and 13 percent under the prior 4-week average. Major increases were reported for Mexico (41,100 MT), Costa Rica (24,500 MT), the Dominican Republic (19,300 MT), unknown destinations (15,000 MT), and Colombia (9,100 MT). Decreases were reported for Guatemala (4,600 MT). Exports of 203,500 MT--a marketing-year high--were 86 percent above the previous week and 74 percent over the prior 4-week average. The primary destinations were Mexico (59,900 MT), the Philippines (33,000 MT), Canada (23,600 MT), the Dominican Republic (18,800 MT), Guatemala (15,900 MT), El Salvador (15,200 MT), Cuba (13,400 MT), and Colombia (10,100 MT).

Soybean Oil: Net sales of 600 MT were primarily for Canada (200 MT), Mexico (100 MT), Trinidad (100 MT), and Qatar (100 MT). Decreases were reported for Saudi Arabia (200 MT). Exports of 1,300 MT were mainly to Canada (700 MT), Mexico (100 MT), Trinidad (100 MT), Qatar (100 MT), and Kuwait (100 MT).

World Agricultural Supply and Demand Estimates (WASDE) released by US Department of Agriculture on January 12, 2006.

The brief summary on oilseeds is based on the above-mentioned report.

OILSEEDS: U.S. oilseed production for 2005/06 is estimated at 96.4 million tons, up 1.4 million tons from last month, and up 0.5 million tons from last year. Although soybean production accounts for most of the increase, sunflower seed, canola, cottonseed, and peanut production are also higher. Soybean production is estimated at 3,086 million bushels, up 43 million bushels from last month based on higher yields and slightly higher harvested area.

Soybean exports are reduced 70 million bushels to 950 million bushels primarily due to continuing weak sales to EU-25 and China. Export competition from South America has been unusually strong in recent months, reflecting large available supplies from record 2004/05 soybean crops. Soybean crush is raised this month due to a lower meal extraction rate. Soybean stocks are projected at 505 million bushels, up 100 million bushels from last month.

The U.S. season average soybean price range for 2005/06 is projected at \$5.10 to \$5.80 per bushel, up 10 cents on both ends of the range. Prices are raised based on a higher-than-expected season average price to date. Soybean oil prices are forecast at 20.5 to 22.5 cents per pound compared with 20.5 to 23.5 last month. Soybean meal prices are projected at \$165 to \$180 per short ton compared with \$155 to \$180 last month. Global oilseed production for 2005/06 is projected at a record 389.0 million tons, up 2.0 million tons. Foreign production is projected at

292.5 million tons, up 0.6 million tons. Global sunflower seed production is projected at 29.9 million tons, up 0.7 million tons from last month. Russia's sunflower seed crop is raised 600,000 tons to 6.4 million tons due to higher yields. Other oilseed production changes include a increased rapeseed production for India and EU-25, and reduced palm oil production for Malaysia. Brazil soybean production for 2004/05 is raised 2 million tons to 53 million tons, a record despite drought in southern Brazil. Source:WASDE

Malaysia: February Palm Oil Exports Up by 6.82 %

Malaysian's palm oil exports in February 1-10, 2006 totalled 322421 metric tonnes as against 301825 metric tonnes of January 1-10, 2006, it is up by 6.82 per cent.

Details of major items, which is estimated by SGS are as follows: Table 1 shows that RBD Palm Stearin and Crude Palm Oil export sales are increased by 40.71 and 149.02

per cent respectively during the period of February 1-10, 2006 as compared to January 1-10, 2006. On the other hand, Table 1 shows that the export sales of RBD Palm Olein and RBD Palm Oil are declined by 12.65 and 50.22 per cent during same period.

Table1: Shows the details of the major items in SGS estimate

(Unit: MT)

| Items | February 1-10 2006 | January 1-10, 2006 | Change % |
|------------------|--------------------|--------------------|----------|
| RBD Palm Olein | 123557 | 141445 | -12.65 |
| RBD Palm Oil | 25235 | 50694 | -50.22 |
| RBD Palm Stearin | 28062 | 19943 | +40.71 |
| Crude Palm Oil | 77445 | 31100 | +149.02 |

Major Importer countries/continents of Malaysian palm oil

Estimates of export data released by Cargo Surveyor SGS for the period of February 1-10, 2006. The major importers of Malaysian palm oil were as follows:

1. European Union 2. China 3. USA and 4. India

Country wise brief highlights of imports are as follows: Table 2 shows that import of Malaysian palm oil from China, USA and India declined by 30.82, 82.84 and 48.49 per cent respectively during the period of February 1-10,

2006 as compared to January 1-10, 2006. However, Import of Malaysian palm oil from European Union increased by 662.81 per cent during the same period.

Table 2: Shows the major import destination of Malaysian palm oil:

(Unit: MT)

| Countries/Continents | February 1-10 2006 | January 1-10, 2006 | Change % |
|----------------------|--------------------|--------------------|----------|
| European Union | 122431 | 16050 | +662.81 |
| China | 45554 | 65852 | -30.82 |
| United States | 5887 | 34300 | -82.84 |
| India | 8250 | 16015 | -48.49 |

Malaysia: February Palm Oil Export Up by 19.43 %

A cargo surveyor Intertek Agri Services released an estimate of palm oil export sales on February 10, for the period of February 1-10, 2006. Malaysian palm oil export increased to 335305 metric tonnes during February 1-10,

as against 280750 metric tones during January 1-10, it is up by 19.43 per cent.

Source: Intertek Agri Services

MPOB: January Palm Oil Production Down By 12.86 %

Malaysian Palm Oil Board (MPOB) released December Production, export and Stock data of Malaysian palm oil. Malaysian palm oil production in the month of January is

declined to 936592 metric ton from 1074777 metric ton as against the month of December; it is down by 12.86 per cent. Export of Malaysian palm oil declined in the month of

January at 963931 MT from 1023669 MT in December; it is declined by 5.84 per cent. January stocks are increased to 1539796 MT from December stocks 1603731 MT, it is down about 4 per cent.

Table: MPOB Data (January)

(Unit: MT)

| Items | MPOB January 2006 | MPOB December 2005 | Change % |
|------------|-------------------|--------------------|----------|
| Production | 936592 | 1074777 | -12.86 |
| Export | 963931 | 1023669 | -5.84 |
| Stocks | 1539796 | 1603731 | -3.99 |

Two Biodiesel Plants to Built by Kulim

Malaysian palm oil producers Kulim are planning to build two biodiesel plants, keeping in mind that higher crude oil prices and dependency on other countries for petrol and diesel. The biodiesel plants will be opening one plant in southern Johor state and another one in Singapore. These bio-diesel plants will be built in collaboration with German company CremerOleo GmbH (50:50 joint venture). The plants, which will start operating middle of next year and produce 100,000 tonnes of biodiesel annually, are

expected to contribute 500 million ringgit (133 million dollars) to Kulim's turnover by 2008, said Zulkifli Ibrahim (Kulim chief operating officer). There is strong demand for bio-diesel from Europe and other countries. Malaysia has already begun preparations to switch from diesel to bio-fuels by 2008, including drafting legislation that will make the switch mandatory. Malaysia is the world's largest producer of crude palm oil.

DOMESTIC MARKET ANALYSIS

Palm oil

Palm oil prices at physical market improved slightly during this week. A Cargo surveyor Intertek Agri Services released his export estimates on Friday i.e. February 10, he revealed in his export estimates that Malaysia's palm oil exports during February 1-10 totaled 335305 metric tons as against 280750 metric ton from January 1-10, it is up by 19.43 per cent. Another surveyor SGS (Malaysia) Bhd. revealed 6.8 per cent higher export sales in his export estimates for Malaysian palm oil during 1- 10 February as compared to

January 1-10. Malaysian Palm Oil Board released official January supply and demand data on Friday, which shows decline in production, export and stocks figures 12.90, 5.80 and 4.0 % respectively in January 2006 as against December 2005. There is news that Malaysian palm oil producer is going to build two biofuel plants, keeping in mind that the strong demand for bio-diesel from Europe and other countries. Palm oil prices are expected to move range bound with weak sentiments.

Soy oil

Domestic soy oil prices went up during this week in most of the markets. NCDEX March soy oil future prices increased during this week due to talk in the markets that GOI is

planning to hike tariff rate on soybean oil and palm oil to restricts soybean and palm oil import in the interest of domestic mustard oil. The above-mentioned factors brought

positive impact on its prices on future as well as spot markets. Arrivals of soybeans per day during this week were in range of 1.00 lakh to 1.10 lakh bags (1 bags= 85

kg) in major markets of India. Soy oil prices are expected to move range bound with positive sentiments in next week.

Rape/Mustard Oil

Mustard oil prices on spot market were range bound with positive sentiments during this week only due to improvement of vayda bazaar. Higher prices of soy oil on future market as well as spot markets brought positive impact on mustard oil prices. However, harvesting of mustard crop started in some pockets in Kota region. Daily

arrivals of new mustard seeds are about 1200-1500 bags in Kota only. Harvesting of mustard crop in Shri Ganganagar area is expected to begin from first week of March. Mustard oil prices are expected to decline due to new crop harvesting pressure in coming days.

Groundnut oil

Domestic markets prices of groundnut oil improved slightly during this week in most of the markets. Groundnut oil prices followed the soy oil prices on spot markets. The arrivals of groundnut seeds are declined slightly during this week in Gujarat markets. It is expected to improve groundnut oil prices slightly in Gujarat markets in next week

due to low supply of groundnut seeds. On the other hand, groundnut oil prices are expected to decline slightly in Chennai and Andhra region in next week only because harvesting pressure.

Cotton Refine Oil

Cotton oil prices on physical market moved up sharply during this week in most of the markets amidst positive market sentiments of edible oil. Cotton oil prices climbed behind the soy oil prices in most of the markets during this

week. Another reason was that the lower arrivals of cottonseeds in Madhya Pradesh brought positive impact on its prices. Cotton oil prices are expected to move range bound with positive sentiments in next week.

INTERNATIONAL MARKET WEEKLY HIGHLIGHTS

Palm oil Market Malaysia

Crude palm oil futures at the Bursa Malaysia Derivatives settled up on Friday. The benchmark April CPO contract settled at MYR1466 per metric ton it is up by MYR2 from Thursday after moving between MYR1455 and MYR1467. BMD CPO futures followed the higher soyoil futures on the Chicago Board of Trade. Malaysian Palm Oil Board revealed in its monthly report that palm oil stocks totaled 1,539,796 tons at the end of January, it is down by 4% on month and Malaysian palm oil exports down by 5.8% on

month to 963,931 tons in January. Cargo surveyor Intertek Agri Services estimated Feb. 1-10 Malaysian palm oil exports at 333,305 tons, it is up by 19.43 as against Jan 1-10. Another surveyor, SGS (Malaysia) Bhd., pegged Feb. 1-10 exports at 322,421 tons, it is up by 6.82% during the same period. Higher export estimates for the Feb. 1-10 period as compared to Jan 1-10, brought positive sentiments in the markets.

Soybean Market United States

Soybean oil future prices on Chicago Board of Trade were range bound with weak sentiments during first 4 days of this week due to rising stock of US soy oil and favorable weather for soybean crop in South America and fifth day of this week slightly improved due to forecast of dry weather for South Americas. March soybeans oil prices moved in

range of 22.07 to 22.85 cents/pounds during this week. Speculative selling pressure could be the other reason to pull down the market most of the days in this week. US export sales report revealed bearish market sentiments. CBOT soy oil prices are expected to move range bound in next week.

South American Soybean Market:

South American soybean futures settled higher on Friday. March South American soybeans settled 9 cents higher at

\$6.22/bushel. Heavy rain in recent past hit the Brazil's number one soybean producing state of Mato Grosse.

Heavy rain this time is expected to reduce the yield and injure crop. This could also slow the harvest. Talk of new fund buyers entering into the market also supported to boost the market sentiments. Strength in energy market and emphasis on bio-diesel based on soybean oil helped to

push up the market sentiments further. Recent forecast hike by USDA on Brazil's export is at 26.07 million tonnes for 2005/2006 which reveals that Brazil now hold the top position in the world for export.

NCDEX Soy Futures Markets

NCDEX March soy oil futures moved up sharply during this week. NCDEX March soy oil future prices increased during this week due to talk in the markets that GOI is planning to hike tariff rate in current budget on soybean oil and palm oil to restrict soybean and palm oil import in the interest of domestic mustard oil. There is news that Malaysian palm oil producer is going to build two biofuel plants, keeping in mind that the strong demand for biodiesel from Europe and other countries. Bio fuel plant from Malaysian palm oil brought positive impact on palm oil future prices on BMD, BMD CPO future surged sharply higher on Thursday. The above-mentioned factors brought positive impact on its future prices as well as spot markets. March soy oil future prices settled sharply higher at NCDEX on Thursday. NCDEX March soy oil prices settled higher Rs 7.05 at Rs 369.10/10 Kg, it was Rs 1.10 off the high and Rs 3.10 up from the low. March oil prices moved in range of Rs 355.95 to Rs 370.20. Soy oil prices are expected to move range bound with positive sentiments in next week.
