## DOMESTIC MARKET

### Soy meal

Steady condition persists in the domestic market in lack of any fresh news. The prices at the spot market remain steady with slight fluctuation in different centers amid depleting stocks of seeds and poor availability of seeds to the mills and emerging demand from the feed industry and Far Eastern countries. Plants are working for limited period of time and even working for limited hours. Unavailability of crushing seeds by the miller results into spurt in the prices in the physical market. High demand from the export end is also supporting the market up and providing underlying support. The meal gets short even for the export, as exporters are not enough meal for the same. Traders are even not getting the requisite amount of meal to fulfill the demand. Emerging demand from the poultry industry also helped to gain in the prices as the industry is struggling for its revival. Government announcement for relief packages for the poultry industry could also help to solve the growing demand of the poultry industry and further helped to reduce the indebted condition of the hatcheries. Demand from the exporters help to rejuvenate the declining industry after the bird flu pandemic, but still they are not getting the required quantity of the meal for export. Traders are optimistic about for any further increase in the prices. Most of the domestic centers remain firm. International scenario remains still in favour of bears as the harvesting continue in full swing in South America. Traders are keenly watching the situation and waiting for any fresh news. It is expected that the prices may improve in near term on account of fresh demand from Far East countries. Far East countries are looking towards India thereby seems some ray of hope for the exporters. The domestic prices are likely to improve in coming days due to acute shortage of the seeds in the physical market. At ports, Mumbai and Kandla witnessed improved trading today. Sellers are quoting high and even buyers are not getting enough to export. The prices are likely to improve in the coming days. The prices at Indore spot market improved slightly and varied between Rs 8100-8200/ton as per quality. Where Nanded and Latur is traded in between Rs. 8800. Dhulia/Jalna and Datia witnessed Rs. 8500 and 8400 respectively. In Nagpur the meal witnessed Rs. 8400/8700. Futures market witnessed no trading on the May and June contract. The rate at the ports increased amid non-availability of adequate meal as the arrival is shrinking and stock is depleting very fast.

#### Groundnut meal

Groundnut in the domestic market decrease slightly today. The prices are expected to remain on the higher levels due to reduced supply and unavailability of seeds in the market. This lead to slow crushing in the mills and low availability of meals in the open market. Some export demand also help to boost the prices up in the market. The price is expected to improve in coming days, as there are very low stocks left and stocks in stronger hand. Exporters are not getting the enough meal to export. GN meals (40%) by cash were at Rs 6200 and (45%) at Rs 6700 per MT on cash in Saurashtra.

## INTERNATIONAL MARKET

### CBOT Soy Futures Decline on Weather Concern

July Soybeans settled down 3.25 cent at \$5.90/bushel, 4 cent off the high and 2.50 cent up from the low. November Soybeans settled down 3.50 cent at \$6.1025/ bushel, which was 2 cent up from the low and 3.75 cent off the high. July Soymeal settled down \$0.8 at \$173.6/ton which was \$0.6 up from the low and \$1.2 off the high. July Soybean Oil closed down 0.06 cent at 25.2 cent/pound, 0.1 cent off the high and 0.19 cent up from the low. Idea in the market about correction over sold region to the neutral region help to weaken the market initially. Wet weather in the central and eastern regions is expected to delay the planting of corns which pressure soybeans and support the corn market. If there will be delay in planting corn then there would be meager chances of planting extra corn and thereby the extra area would shifted towards soybeans. The burgeoning ending stocks for the 2005/2006 season and expected further increase in the stocks further added to its bearish tone. For the weekly export sales report, traders are expecting soybean sales near 200,000-300,000 tonnes as compared to 194,600 tonnes last week. Meal sales are expected hover around 75,000-125,000 tonnes and oil sales near 0-10,000 tonnes. For the Census crush report, traders are expecting March crush near 148.5 to 149.5 million bushels compared to 148.5 million last year. Meal stocks are expected near 310,000 tonnes and oil stocks near 2.765 billion pounds.
