## DOMESTIC MARKET COMMENTARY

### Soybean:

The prices of the soybean seeds taken a giant leap amid high demand from the plants. Heavy demand of DOC and surge high in soy oil prices enhance the demand for seeds. Low arrivals of seed combined with stocks in strong hand also had a bullish impact over its prices. Plant delivery rate quoted significantly higher today at Rs. 1335-1375 + 4% VAT and Mandi rate improved and varied between 1295-1320. Arrivals remain in between 20000 bags from MP, and moderately high at 20000-25000 from Maharashtra and arrivals from Rajasthan observed at 3000-4000 bags.

### Rapeseed/Mustard:

Mustard seed improved slightly in the physical market as it is indirectly getting support from soy oil as it firm enough to keep the prices of mustard oil on upper level. Rumor about possible significant hike in the tariff value results into steep rise in the soy oil futures. Stockist are stocking the seeds in anticipation of getting off-season premiums. NAFED stopped procurement in some area from the local markets as they are finding difficulties for proper warehousing of the produce. The prices are expected to remain range bound in the physical market in coming days and the fate of mustard seed prices will much depends on the procurement by stockist. Average arrivals remain at 150000-200000 bags.
