PALM OIL

International Market Highlights

BMD CPO Futures Decline on profit Booking

Crude palm oil futures on the BMD settled down on Friday amid on short covering and profit booking stage. The most active October contract settled at MYR1, 611 per metric ton, down MYR30 from Thursday. The steep decline might be due to the concern that prices in near terms moved abruptly to unrealistic high and traders are rushing to book there profits. Traders viewed that the market will maintain its up trend as the benchmark contract remains still above the key MYR1, 600 psychological support level. With rising crude prices the market is expected to move forward on bio-diesel concern. The export data on coming data also expected to remain bullish for the palm oil futures. It is expected that the palm oil stock is expected to decline further.

The prices at Kandla Palmolein saw marginal decline while at Mumbai it saw some improvements. The prices at other locations remain almost steady.
