Rape/Mustard oil

Rape oil markets observed lusterless trading. NAFED still is having substantial stock with it. Weak demand in spot markets continued to weigh on values. People are not optimistic about its friendly outlook in long term. Recent rains have replenished enough soil moisture for rabi season. However, acreage under the same in coming crop season might decline, as farmers might have high inclination towards other available alternatives like Gram, of which perspectives seem quite promising.

Groundnut Refine Oil

Correction was also seen in groundnut oil markets. Weather has improved in Gujarat. It's harvest is in progress. Arrivals of groundnut in Rajkot belt totalled at 15,000 - 20,000 bags, which traders are expecting to increase to 50,000 bags in couple of weeks. Trading remained low, as people are not convinced with current high prices ahead of its harvest. Also, spill over weakness in imported oil weighed on its values.

Sunflower Refine Oil

Sunflower oil was the only exception among veg oils that had seen slightly bullish trend. Demand for the same remained weak. Only supportive factor is its low inventories. Traders are expecting ease in its prices with increase in supply of groundnut oil coming weeks, of which harvest is in progress in most key producing areas.

Cotton Refine Oil

Sentiments remained weak in cottonseed oil markets. According to traders, this correction was due as market was in overbought situation. Also, harvest of groundnut is expected to gain momentum, as weather has improved across Gujarat.
