DOMESTIC MARKET

Soy meal

Soymeal showed range bound sentiments due to slightly improved buying support in spot markets amidst steady demand in overseas market. Since new contracts for soymeal have not yet been reported, the trend for meals is likely to trader range bound. Higher prices of soybean are driving up the rates for soymeal due to decrease in crushing margins for soymeal thus obtained. Overseas suppliers are finding an edge over Indian Soymeal because it is priced higher than its counterparts. Overseas suppliers are taking advantage of competitively priced meals. As per press release of SOPA a significant growth of 45.98% was noted for soybean meal exported last month, about 2.9 lakh MT of soybean meal was exported during October 2006 as compared to 1.98 lakh MT exported during the same period last year. The total exports of Soybean meal for April to October this year was 17.24 lakh MT as against 9.44 lakh MT during the same period last year thus registering a growth of 82.57% over the last year. China was the main importer of groundnut meal for this year; the imports were to a tune of 43,200 tonnes till October 2006.
