DOMESTIC MARKET

Soy meal

Soymeal sentiments improved considerably on good demand from feed industry in domestic and South East Asian countries. With the poultry sector growing at 10%, the shortfall in domestic maize crop is a cause for concern that added to support bullish trend for soymeal in major markets. Nearly bullish sentiments for soy futures in International and domestic futures market scale up rates to some extent. Domestic production of other soymeal exporting country is likely to fall owing to reduced production thus allowing India an edge over others in terms of pricing. Indian soymeal is offered at competitively priced so as to attract buyers from abroad [UAE, Vietnam & Indonesia and Thailand]. The Soybean meal export jumped from 721,900 tons to 975,975 tons. Vietnam has become largest importers of Soybean meal and imported over 325,000 tons. China mainly imported Soybean meal to a tune of 79,800 tons as per Solvent Extractors Association of India.
