

## GUAR DAILY

December 13<sup>th</sup>, 2006

### GUAR

#### SPOT MARKETS:

The guar prices restricted at previous days' range on the bearish nature of futures market. Increased selling interest among the investors at futures market has restricted the buyers' activities at spot market. Moreover, the steady arrivals at lower side amidst steady demand did not give the scope to flourish the market northwards. The arrival is reportedly near about 25000-30000 bags in all over India. Stockists remain the active buyers in the market and they are more interested to increase their stock position to get more profit in the off-season. Millers' buying are improved somewhat. However, lower quotation of Pakistan's guar gum export price as against India is still pressurizing the guar market sentiments here. However, sharply decreasing stocks of guar in Pakistan might be increasing the scope of export from India in near future.

#### FUTURES MARKETS:

NCDEX Guar seed futures observed range bound trade with bearish undertone. The most active January contract open firm at Rs. 2064. However, increased selling pressure at higher levels has slid down the market and settled red. January contract moved in the range of Rs. 2074-2034 per qtl, while the December contract moved in the range of Rs. 2030-1996 per qtl. Guar gum December contract traded in the range of Rs. 5042-5125, while the January contract fluctuated in the range of 5165-5258 per qtl.

#### PRICE DRIVERS:

##### Bearish:

1. Expectation of higher production as compared to previous year
2. Poor demand at higher price levels
3. Pakistan's export prices remain lower as against India

##### Bullish:

4. Millers demand improved somewhat
5. Good stockists demand amidst steady arrivals
6. Expectation of higher export in the coming future

#### WEATHER IMPACT:

Guar harvesting is almost completed in major guar producing belts, and therefore, weather is not a concern at the moment.
