

## PULSES DAILY

### URAD

#### FUNDAMENTALS

Urad traded steady to slightly firm today in most of the spot markets. Prospective dal demand during the Pongal festival might induce miller to cover in advance. However, any sort of firmness will probably not last for long, as harvest of Andhra crop will ease the sentiments. Harvesting of Chhoti Urad is in progress in Eastern part of the country. In January Andhra crop will start leaving the fields. However, as the quotes from Burmese exporters are not coming down much, the supply side is not getting any support from the imports of the commodity. Recent quote of \$700 per ton is still far away from the domestic prices. Thus it seems the prices might find some support in festive demand, which will ease on harvesting in AP.

#### Futures Market Commentary

Urad futures at NCDEX today hit upper circuit. January futures of Urad at NCDEX started the session firm at Rs 3165 and then prices surged to the highs of 3282 breaking the 4% circuit limit. The bulls looked directing the today's trade. The contract finally closed the session at Rs 3296 after trading as high as Rs 3308 a quintal. The surge in the prices was well backed by a good volume of 33540 MT; open interest also inched higher.

#### Price Drivers

##### Bearish

Higher quotes by Burma  
Demand to revive ahead of Pongal  
Healthy crop of AP lining up for harvest  
Poor stockists activity

##### Weather

Weather is suitable for harvesting of Urad in Orissa. It is also clear in Andhra where crop is in maturity stage.

December 12, 2006

#### TECHNICALS

##### NCDEX -January Contract

Urad showed strong positive move today. Prices closed well above EMAs, which shows firmness in the market. MACD is showing increase in bearish momentum. Stochastic are positive in neutral region. The prices might continue the firmness.

#### Support / Resistances:

Contr act	S1	S2	PCP	R1	R2
Jan	3256	3205	3296	3347	3398

#### Trade Recommendation:

Buy Jan Urad above 3260 with target towards 3335 and then 3374. Put SL at 3220.

## CHANA

### FUNDAMENTALS

Chana prices continue to remain steady to slightly weak in the absence of active trade in the physical markets. Importers are finding it risky to strike fresh deal of Chickpeas, as it will need about a month to result in delivery by that time AP crop harvest will start. Harvesting of 'Annagiri' variety will start in January in Karnataka to be followed by Maharashtra Chana in February. Thus, at this stage domestic stocks, which are depleting day by day, are the main source of supply. As demand has become quite prices sensitive, stockists are not finding it easy to push the price their way. As the market is shallow the prices can move either way before finally easing on crop arrivals.

### Futures Market Commentary

Chana futures at NCDEX finally were dragged along with other pulses after initial hesitation today. January Chana started the session on a firm note at Rs 2688 and then it traded volatile initially, however firmness in other pulses supported it to close firm at Rs 2749 near the day's high. The volumes and open interest both increased today.

### Price Drivers

#### Bullish

Depleting stocks

#### Bearish

Australia has exportable surplus of 2.25 lt Chickpeas  
Increased acreage this year

#### Weather

Weather is congenial for the vegetative growth of the crop.

### TECHNICALS

#### NCDEX -January Contract

Chana charts are displaying weakness in the market sentiments. Candlesticks show tentativeness at lower levels. Prices closed below 9-day EMA showing weakness in the market. MACD is showing increasing bearish momentum. Stochastic are flat in the oversold zone. The prices might extend bearish trend.

#### Support / Resistances:

Contr act	S1	S2	PCP	R1	R2
Jan	2722	2691	2749	2798	2824

#### Trade Recommendation:

Buy NCDEX Chana Jan contract above 2720 with target of 2781. Second target 2804. Put SL at 2685.

## TUR

### FUNDAMENTALS

Tur prices remained steady at most of the spot markets today with the harvesting in major producing states slowly gearing up. Arrivals in Andhra Pradesh have increased to the tune of 8000 bags. Jalna belt is also witnessing some arrivals these days. Lemon tur is not cheaper enough to be imported profitably. Also, looking at the harvesting season the importers are not interested in it. As the production is expected to fall this year, most of the traders are seeing bright prospects for tur prices this year which is resulting in good stockists activity right from the beginning of harvest. If the industrial buyers also join them, some short-term bounce in the prices can be seen.

### Futures Market Commentary

Tur Futures at NCDEX rebounded today after slight weakness on Saturday. January futures of Tur at NCDEX started the session firm at Rs 1927 and then it never looked back. The contract finally culminated the session at Rs 1889 after surpassing the 4% circuit limit during mid session. Poor crop expected this year is proving underlying support to the prices.

### Price Drivers

#### Bullish

Demand from stockist  
Production is expected to dip this year  
High import cost

#### Bearish

Fresh arrivals in all major producing states

### Weather

Weather is congenial for Tur harvest in major producing states.

### TECHNICALS

#### NCDEX -January Contract

Tur showed some decisive action today. Prices closed well above EMAs, which shows firmness in the market. MACD is showing increase in bearish momentum. Stochastic are positive in neutral region. The prices might extend the gains.

#### Support / Resistances:

Contr act	S1	S2	PCP	R1	R2
Jan	1944	1899	1989	2017	2045

#### Trade Recommendation:

Buy NCDEX Tur Desi Jan contract above 1976 with target towards 2007 and 2017. Put SL at 1956

## OTHERS

### Moong

Moong markets saw steady prices today. As the harvesting is over in major growing regions arrivals in the terminal markets are falling day by day. However, there is not much scope for the prices on the higher side as price elasticity of demand for the commodity has become quite high.

#### Spot Market Prices of Moong

(Rs/qttl)

Chamki	Latur	2850	NA
Chamki	Akola	3100	3100

### Field Peas

Field peas prices are dancing in a range these days. As the Australian field pea production this year has gone down to 206000 MT as compared to previous year's crop of 478000 MT, global prices of field peas are surging, thanks to good demand from southern Asia. Despite higher prices of Canadian and Australian peas, India continues to import green and white peas as the prices of other pulses are skyrocketing.

#### Spot Market Prices of Pea

(Rs/qttl)

Center	11.12.06	09.12.06
Mumbai (W.Canadian)	1251	1271
Kanpur	1470	1475-1480

### Masoor

Masoor prices remained stand still at higher levels. As the Australian lentil production dipped sharply this year, prices in the international markets are quite high. According to reports 2006 Australian production (mostly red lentils) is expected to drop sharply, from 210,000 tonnes in 2005 to only 66,000 tonnes this year. Accordingly, exports are seen falling from 200,000 tonnes in 2005-06 to only 55,000 tonnes this year. The prices remained mostly steady today. However, the commodity is not likely to get much support from the domestic demand side, which has inclined towards other cheaper alternatives like peas and vegetables.
