URAD

SPOT MARKET

There was not much action seen in Urad, as supply and demand both remained subdued on Thursday. The supply position however is not very tight at the stage after the kharif harvest. Recently completed harvest of eastern zone also supported it to some extent. In, Vijaywada markets the prices steady along with increasing arrivals on favourable weather. Fresh Urad crops in AP started hitting the market yards and 7500 bags fresh arrivals were seen in Vijaywada on Thursday as compare to 7000 bags on Wednesday. Harvest in the state is likely to increase in coming days, which then might put pressure on the prices. As per latest reports, Rabi Urad acreage increasing by 3.2 % to 8.11 lakh ha as compare to 7.8 lakh ha last year. In AP area under Urad increased by 24 % this year than last year. Further, government is also trying hard to bring down the prices of pulses and in the same line it is planning to import some pulses in the coming months. So, expect some easing in price in ongoing harvest and good supply expected from AP and Orissa crop. in until then some range bound movements is likely.
