

## PULSES DAILY

March 30, 2007

### URAD

#### SPOT MARKET

Urad markets inched remained steady in Mumbai. In Delhi market the prices inched higher in conjunction with the other pulses. Harvesting of Urad is in progress in Vijaywada. The arrivals likely to increased in forthcoming week, which might keep the prices on the softer side in the production centres, where as it may hold in the other centers on account of weak demand in the year-end closing.

## CHANA

### SPOT MARKET

Chana prices remained firm in most of the spot markets on account to temporary void in the supply side. Farmers are said to be holding their produce in anticipation of higher prices. The market players have turned bullish on Chana looking at the firmness in other pulses. However, some easing in the prices is likely once the arrivals gather momentum. As the arrivals are not picking up much in major production centers, the prices are holding the higher levels. Demand from miller's side is strong as the pipeline was empty on account of poor production last year. Government is planning to import pulses to curb the prices in domestic markets, which might ease the prices of pulses to some extent in the coming time or at least restrict them from touching the last year's levels. The prices might hold the levels for the time being until arrivals increases.

### Futures Market Commentary

Chana prices in the futures markets witnessed roller coaster movements Thursday. April futures at MCX started the day on a firm note at Rs 2370 and then prices surged on aggressive buying to the highs of Rs 2380. However, the prices couldn't sustain the higher levels and slipped to the lows of Rs 2339 before finally closing the session at Rs 2364. Similarly on NCDEX, April Chana traded volatile between Rs 2342-2392 before closing the session at Rs 2372 per quintal. The volumes traded and open interest both dipped lower during the session.

### Price Drivers

Steady Arrivals in MP and Maharashtra

Improved demand from millers

Hazy picture about quantum of production after recent poor weather conditions I Rajasthan

### Weather

Mainly dry weather is likely over the Chana growing regions, which is favorable for the matured and maturing crop.

### TECHNICALS

#### NCDEX -April Contract

Candlestick has formed a doji pattern, which shows indecision in the market sentiments. The prices closed above short term EMAs, hinting for firmness in the market. MACD is moving upwards in the positive territory indicating increasing accumulation. Stochastic has made bearish crossover in overbought region. The prices are likely to see volatility.

## TUR

### SPOT MARKET

Burmese Tur inched higher in some of the markets on increased buying interest of traders in the commodity; however in the rest of the centers it remained stand still. In Delhi markets the prices of Tur remained steady. Latur, Jalana and Akola markets also witnessed steady prices of Tur. Steady to shrinking arrivals in production centers along with healthy demand on account of poor production this year is keeping the prices on the firmer side.

## OTHERS MOONG

Firmness in other pulses underpinned the prices of Moong Thursday. Poor supply of the commodity and demands from dal millers are supporting the prices of commodity to some extent. As per latest report, Rabi Moong acreage increased sharply by 18 % to 6.69 lakh ha as compare to 5.67 lakh ha last year. As the crop is mainly grown in Kharif, small crops of Rabi are not likely to ease the prices in a big way.

## FIELD PEAS

Desi peas prices remained steady to slightly firm Thursday as good demand from millers kept the prices buoyant. Harvesting is likely to gather momentum in first week of April. In Mumbai market different imported peas quoted steady to slightly firm. Slightly lower stock of the commodity supported its prices. However, sharp down fall the prices in peak harvesting season is unlikely as lower production expected this year on 12% decreased in acreage.

## MASOOR

Most of the markets witnessed sky rocketing prices Thursday as continued good demand from stockists and millers pressured the prices higher. In MP and UP, currently harvest going on and arrivals are expected to increase in coming days. The prices might see some stability with progress of harvest, however good demand from stockists might keep the downside limited.
