

■ BLACK PEPPER

■ July 09, 2007

SPOT MARKETS

Black pepper markets remained quiet at the weekend. It was offered in an unchanged price range in Kochi markets amid no arrivals as well as offtake. Prices declined in past few days on news that Vietnam is reducing price tag in order to clear its stock ahead of the entry of Indonesian and Brazilian crop in the global market. According to news by Peppertrade Board of Brazil, Vietnam has exported around 42,252 metric tonnes during January-May 2007 of the total 96,365 metric tonnes total available supply for the season. It has also estimated the balance for export at 49,692 metric tonnes after deduction of 46,673 metric tonnes on account of total use during the first five months of the year.

FUTURES MARKETS

Black pepper futures at NCDEX opened lower as compared to previous settlement and the most active August contract tested an intraday low of Rs. 14860 at the opening session of trade. Increased buying interest has supported the futures thereafter and the futures retraced back to test an intraday high of Rs. 15190 at close. The futures finished with over 1 per cent gain in final action. Most active August contract traded in the range of Rs. 14860-15190 during Saturday's trade.

PRICE DRIVERS

Bullish:

1. Total margins on futures reduced by FMC
2. Increased US demand for Indian pepper

Bearish:

1. Stocks with commodity exchange warehouses over 15,000 tonnes

WEATHER

Rain/thundershowers are likely over pepper growing regions. It would be beneficial for the growth of newly planted as well as old vines.

TECHNICALS

Candlesticks pattern indicates steady to firm opening and initial uptrend. Prices closed below the 9-day as well as 18-day EMA, a bearish set up for the market. MACD is moving downwards in positive territory. 14-day RSI is neutral and moving upwards, leaving scope for further uptrend. Volume has declined, while open interest has increased as compared to previous settlement. Pepper futures are likely to trade upwards following a steady to firm opening with possibility of some downward movements later in the session.

■ CUMIN

■ July 09, 2007

SPOT MARKETS

Domestic jeera markets remain on an average stable during Saturday's trade. Rains in Gujarat have dampened the trade of jeera at Unjha. According to a recent FMC directive, total margins on jeera have been reduced to 12.5 per cent on selling and 18.5 per cent on buying effective beginning of trade on July 6th. This is likely to increase participation in the market. However, the curb on open position limit still holds that has put a negative impact on trade participation in the futures market. Low output estimates are expected to support the jeera market. Rains in Gulf countries have damaged the cumin crop, tightening the supply condition globally.

FUTURES MARKETS

Jeera futures at NCDEX opened marginally lower than previous settlement and most active August contract tested an intraday low of Rs. 12565 at the early hours of trade. The futures traded upwards thereafter on some buying support at lower price levels and tested an intraday high of Rs. 12775 during late hours of trade. The futures finished higher in final action. Most active August contract traded in the range of Rs. 12565-12775 during Saturday's trade.

PRICE DRIVERS

Bullish:

1. Lower domestic production
2. Reports of decline in production in Syria, Turkey

Bearish:

1. Lack of buying support in markets

WEATHER

Rain/thundershowers are likely at many places over Gujarat and East Rajasthan during next 24 hrs. and increase thereafter. Weather is not crucial at present as the harvesting season is over.

TECHNICALS

Candlesticks pattern indicates steady to firm opening and initial uptrend. The close below the 9-day as well as 18-day EMA is a bearish indication for the market. 14-day RSI is neutral and leaving scope for both way movements. MACD is moving indecisively in negative territory. Volume as well as open interest has declined as compared to previous settlement. Jeera futures are likely to trade upwards following a steady to firm opening with possibility of some downward movements later in the session.
