

POTATO DAILY

24th AUGUST, 2007

SPOT MARKETS:

Indian potato prices observed steady to rangebound on Thursday at most of the pockets on average demand supply while it was slight down in Bengal and Delhi on improved arrivals against average demand. Arrivals of new potato from Hassan in Karnataka are keeping pressure on the demand of potatoes from Agra region and West Bengal region. The arrivals are likely to pick up in the coming days. However, farmers in Hassan taluk of Karnataka are now concerned about the crop damage as the entire potato crop is affected by dreaded blight disease and heavy rains. In Hassan district, potato is a major commercial crop grown in more than 1 lakh acres of land. Around 20% of the crop was damaged because of heavy rains even as another 40% would perish because of a fear of blight attack. It is expecting that the potato production will reach to 1.3 MMt in the State. In addition, higher prices of other vegetables also underpinned the potato market. Fresh potato from Himachal Pradesh has been arriving in the market. Traders said, so far around 37-42% of potato has been released in Agra of U.P. and West Bengal from the cold storages. Remaining part of the potato is likely to be released in the next 2-3 months so the arrivals will be enhanced at the spot markets. So, the prices are not likely to go up in near future in the spot as well as futures market. On Thursday, potato prices in North Indian markets offered flat while in Bengal's Burdwan and Tarkeswar, it quoted down at Rs. 730-760 and Rs. 760-790/qrtl respectively.
