REFINED SOY OIL

SPOT MARKET:

Despite jump in CIF price by \$16 and bullish USDA report, spot prices of refined soy oil traded on softer side of poor demand. Currently edible oil is struggling across domestic markets as prevailing prices still too high to support demand coupled with expectation of further weakness kept buyers aside. As per USDA monthly report on World S&D estimation, September world soy oil ending stocks is projected at 2.82 mmt down from 2.85 mmt August's projection. September world soy oil production is forecasted at 37.62 mmt up from last month 37.44 mmt. For India, September soy oil production and usage projection is expecting at 1.23 mmt and 2.79 mmt up from August's projection at 1.22 mmt and 2.78 mmt, respectively. The crude soy oil CIF prices of September shipment gained sharply on Thursday at \$912 per tonne as compared to Wednesday's \$896 per tonne.

Bullish WASDE report and strong global cues strengthened BMD with spill over impact on **NCDEX** refined soy oil futures and market recouped slightly, profit taking lent some support. Rape/Mustard oil

Weakness in mustard oil maintained domestically on improvement in selling pressure from stockists and poor demand. The trade activities remain suspended as most of the traders stayed away from market in expectation of further weakness in prices in near-term. The underlying weakness in other edible oil also lent weakness. Current outpaced supplies to demand are likely to support the bears in coming days.

Groundnut Oil

Spot prices of groundnut oil softened further in domestic markets on dull trading activities and subdued demand. Weakness in seeds and meals domestically favors the bears. On fall short of abrupt improvement in prices, traders preferred to improved supplies that also contributed the bearishness. The prices of groundnut seeds for different qualities stood sluggish on Thursday and trade between Rs. 410-520 per 20 kg up from yesterday's Rs. 410-525 per 20 kg in different market in Gujarat.

Refined Sunflower Oil

Despite sharp jump in crude oil CIF prices, physical prices of refined sunflower oil trapped in bearish trends on improved seeds arrivals and weakness in other vegetable oil. The demand almost remained dull with poor supplies. The CIF prices of sunflower oil for September shipment rose sharply against by \$23 at \$1198 per tonne on Thursday from \$1175 per tonne on Wednesday.

Refined Cottonseeds Oil

Sluggishness in others edible oil spurred weakness in physical prices of refined cottonseeds oil. The trader's waiting for fresh arrivals that is likely to start in next month in full swing, supported the shallow trading domestically. Traders are expecting further correction in prices in coming days is likely due to harvest pressure from Tamil Nadu and underlying weakness in other edible oil.
