

## POTATO DAILY

10<sup>th</sup> SEPTEMBER, 2007

### SPOT MARKETS:

Potato prices remained steady with rangebound on Saturday in most of the market while it was weak in Maharashtra on soars arrivals. Steady demand supply was observed in the market. In addition, higher stocks at the cold storages are negatively affecting the market. A shortage of good quality potato has provided underline support to the market. Arrivals of new potato from Hassan in Karnataka are getting momentum and keeping pressure on the demand of potatoes from Agra region and Bengal region. Rain in Karnataka and lower crop yields in places that supply vegetables to Chennai are reflecting on the prices of a few staple vegetables in the city. As the harvest was hit by the rain in Karnataka from where the market gets its major share of the commodity, the price is not expected to come down till this month-end in South India. Around 20% of the crop was damaged because of heavy earlier rains even as another 40% would perish because of a fear of blight attack. It is expecting that the potato production will reach to 1.3 MMt in the State. Traders said, so far around 40-45% of potato has been released in Agra of U.P. and West Bengal from the cold storages. Remaining part of the potato is likely to be released in the next 2-3 months so the arrivals will be increased at the spot markets and it will decrease the spot and future prices. On Saturday, potato prices in North Indian markets quoted steady while in Bengal's Burdwan and Tarkeswar, it offered flat at Rs. 710-750 and Rs. 725-750/qlt respectively.
