

Oilseeds Domestic Fundamentals:

Soybean (plant delivery, Indore) prices featured mild losses due to bearish USDA report and fall in BMD CPO, Wednesday. Soybean arrivals in Madhya Pradesh were reported up at 160,000 bags compared to 150,000 bags on Tuesday. The farmers have restricted the selling of their produce due to lower prices. RM seed prices witnessed persistent selling pressure on expectations of higher mustard acreage in the current Rabi season and subdued demand in the market.

International Oilseeds Fundamental:

In the latest USDA WASDE report, global soybean production is projected at 267.7 million tons, up 0.1 million tons. The USDA has projected US soybean ending stocks at 130 million bushels vs. 140 million bushels in November. World ending stocks for the 2012-13 season were reported at 59.93 million tons as compared to 60.02 million tons in last month's estimate. Brazil's production and Argentina's production estimates were unchanged from last month. The General Administration of Customs reported that China's November soybean imports were 4.16 million tons, up 3 per cent from 4.03 million tons in October, but fell 27 per cent compared from 5.7 million tons in November 2011.

Outlook:

Soybean plant delivery prices are likely to feature range bound movement on weak buying and fall in the international oils and fats market. However, pick-up in soymeal exports sales and seasonal demand in edible oils may limit downside.
