

## Wheat Domestic Fundamentals:

- **Wheat cash market stayed steady** on balanced supply demand side on Saturday. Steady domestic demand and supply are keeping wheat and flour prices stable. Wheat prices have been ruling unchanged since last one week despite fresh higher allocation for export. We expect prices to rule range bound at current level.
- **In a latest development, the** Government has rejected a top foodgrain pricing panel's(CACP) recommendation of keeping wheat MSP unchanged at previous year's level . The Government has asked the Commission for Agricultural Costs and Prices (CACP) to rework the minimum support price (MSP) of wheat for 2012-13 keeping in mind the rise of cost of inputs such as fertilizer and diesel.
- **This means farmers may receive** more price for wheat either in way of higher MSP or through bonus. The cost of wheat production has gone up to Rs 1128 per qtl. against Rs 927 per qtl. last year. The MSP for wheat in 2010-11 was Rs 1,120 per quintal when the cost of production was Rs 826.
- **In Rajasthan wheat has been sown in** 621,700 hectares so far, which is 22% of the target area. Last year at the same time wheat was sown in 851,300 hectares. Rajasthan has set target of 28, 00,000 hectares against the last years 29, 35,000 hectares.
- **According to PIB (Press** Information Bureau), in India so far wheat has been sown in 91.88 lakh hectares as compared to 92.31 lakh hectares same time last year.

## International Market Update:

- **The IGC, in a monthly report, forecast a global** wheat crop of 654 million tonnes in 2012/13, down one million tonnes from its previous estimate and now 41 million below the prior season after drought cut output in the Black Sea region. The latest cut reflected minor revisions for Australia (21.5 million tonnes from 22.0 million) and the European Union (130.3 million from 130.6 million).
- **Given high prices, the total wheat harvested area** for 2013/14 is set to increase by 2 percent, although conditions for parts of the US are a concern," the IGC said. In the US Plains, hard red winter wheat is suffering, entering its dormancy period in historically bad condition and raising concerns about yield prospects.

**Domestic market Outlook:** Wheat prices are likely to trade range bound at current level. Sowing status has improved considerably and the latest winter rains are considered beneficial to the crop.
