

#### Oilseeds Domestic Fundamentals:

Soybean (plant delivery, Indore) prices featured weak sentiments on weak domestic trading as global markets continue to focus on South American weather and their production outlook in the short term, Tuesday. However, soybeans on CBOT witnessed gains on strong export demand and good pace of sales and shipments. BMD CPO closed higher. Soybean arrivals in Madhya Pradesh improved to 1.50 lakh bags compared with 1.25 lakh bags on Monday. Depleted crush margins for soybean continue to be witnessed currently. Rapeseed/mustard seed prices edged lower in the spot market as well as NCDEX. As per the latest estimates, the RM seed sowing (as on 24 Jan 2013) is up at 67.11 lakh hectares compared to 65.35 lakh hectares at the same period last year, a rise of 2.70 per cent.

### International Oilseeds Fundamental:

USDA has reported that U.S. private exporters sold 220,000 tons of soybeans to China for the 2013/14 marketing year, indicating that a robust export demand is being witnessed currently. Harvest in Brazil's top soy producing state of Mato Grosso has progressed to 7.1 percent of planted area compared with 2.8 percent last week. However, likely rainfall in certain regions of Brazil might disrupt harvesting activity in the coming week.

#### **Outlook:**

Soybean plant delivery prices are likely to feature range bound movement with weak bias on bearish global scenario. The Indore (Plant Delivery) prices are expected to witness 3270-3330 levels.
