

### Potato Fundamentals:

- According to trades sources, Rabi crop area is expected to be 5-7% less compared to previous year but estimations are made that productivity may increase compared to previous year which may produce approximately 125-135 lakh tons of potatoes in U.P.
- According to trade sources in Khandauli arrival are low because of low harvesting due to cold and foggy weather. Prices are expected to increase from February which are currently hovering in the range of Rs 600 to Rs 700/ quintal.
- In North India, maximum wholesale prices were seen in Chandigarh at Rs 1300/ quintal followed by Varanasi and Karnal at Rs 900 and Rs 830/ quintal respectively.

(MCX and NCDEX market were closed on Friday)

In MCX, futures market long liquidation is seen in March contract with decrease in open interest and prices whereas in April and May contract market participants are building sell positions which is visible from decrease in prices and increase in open interest.

## Daily Price Chart of MCX- Agra March Contract:

(Source: AGRIWATCH RESEARCH)

In MCX, March contract is trading in very narrow range of Rs. 810-820 from last 3-4 days. It seems prices are in consolidation phase and trading near its short-term and long-term exponential moving averages. Break on either side of the above level will decide further market direction. Immediate support is at a level of Rs 808-810 and resistance is place in the range of Rs. 818-820.
