

Wheat Domestic Fundamentals:

- Government has 34.38 million tonnes of wheat stock with it which is almost 3 times of the norm and with sowing for current crop has reached 28.6 million hectares which is higher than last year's 28.1 million hectares at the same time. With weather condition favorable and increased MSP farmers might shift to wheat and wheat's final sown area might be around 29.5 million hectares which will again create storage problem.
- Key Spot market traded steady to weak as traders anticipate that government may reduce Rs 100/Q on wheat release price hence market participants are in wait and watch mode.
- PEC has got the highest Bid of USD 321/T from Dubai based Midgulf Company for its wheat tender.
- Wheat cash market traded slightly lower on expectation of higher supply in the weeks ahead. Government may offer discount for wheat through open market sale scheme. Market expects a discount of Rs 100 per qtl. Government too is in urgency of offloading higher stock from central pool as new crop is hardly 3 months away from now.
- On bearish outlook, supported by bumper crop prospects future market too has seen a steep decline in last two days. Medium and bulk buyers are in wait and watch mood and are buying to 80 fulfill their immediate requirements. Even exporters demand has decreased as global wheat prices are cooling down continuously.

International Market Update:

- China has started sourcing high quality wheat from US and Canada as domestic prices has been rising. Chinese wheat crop will be harvested in May and till then China has to import wheat. China has started buying wheat as wheat prices have fallen internationally due to slack buying this might support market lower level.
- Ukraine Agriculture Minister said that Ukraine will be harvesting higher crop in 2013 around 19 million tonnes as compared to 2012 15.5 million tonnes due to severe drought conditions.
- As per the report of USDA the winter wheat sowing area has increased by 3.3% over last year and is highest in last four year despite of drought conditions as domestic prices has been due to lower crop in year 2012.
- Pakistani Seatrade Group will start shipping 100,000 tonnes of wheat to Iran by the end of this month. According to traders the price is around USD 300/T for this 100,000 tonnes. Pakistan will be buying Iron Ore and Fertilizer in return from Iran.

Domestic market Outlook: We expect wheat Cash and future market to trade steady to weak due to increased supply under OMSS-D bulk users will restrict uptrend.
