

Wheat Domestic Fundamentals:

- There are rumors in market that South Korean millers are now turning to other countries for feed wheat supplies due to concern over Indian feed wheat quality. South Korea has emerged as one of the big buyer of Indian feed wheat, in 2012, but millers say it contains high levels of foreign matter, pushing up processing costs.
- OMSS wheat release prices can be discounted by Rs 100 as wheat lifting has been low in previous releases. Government had allocated 6.5 million tonnes but half of the allocated quantity was lifted. Release prices had varied from Rs 1401/Q to Rs 1556/Q for different states. To increase lifting and reduce the stocks government can either go for cutting down prices to Rs 1,170/Q plus freight, absorbing the state levies or fixing the MSP as base price plus freight charges freeing away the state levies.
- Traders and Analyst has concerns that even if government reduces the release price wheat lifting might not pick pace as desired since wheat demand has been sluggish in open market. Traders feel the government should have a clear-cut procurement and selling policies so that traders and bulk purchasers can plan their move.
- Government has 34.38 million tonnes of wheat stock with it which is almost 3 times of the norm and with sowing for current crop has reached 28.6 million hectares which is higher than last year's 28.1 million hectares at the same time. With weather condition favorable and increased MSP farmers might shift to wheat and wheat's final sown area might be around 29.5 million hectares which will again create storage problem.

International Market Update:

- France exported 1.25 million tonnes of soft wheat in November, bringing the total wheat export so far for this season to 6.15 million, down 18 percent on the year-earlier period. France's wheat exports outside the EU since the start of the 2012-13 season on July 1 were down 20 percent at 3.53 million tonnes, while exports within EU were down 16 percent at 2.63 million tonnes
- Australian ending stock could hit critical low by July as buoyant exports and lower production of this year around 22 million tonnes as compared to previous year's 29.5 million tonnes. Australian wheat major importer Indonesia, South Korea, Philippines and China might have to look for other sources to procure wheat. However, it might not affect international prices as supply is expected to increase from other key exporters.

Domestic market Outlook: We expect wheat Cash and future market to trade steady to weak due to increased supply under OMSS-D bulk users will restrict uptrend.
