

Wheat Domestic Fundamentals:

- Yellow and Brown Rust, Fungal diseases has been found in Ropar, Nawanshahar (in Punjab) and Ambala (in Haryana). These diseases are not wide spread and overall production is expected to be good.
- According to PIB (Press Information Bureau), wheat has been so far sown in 294.98 lakh hectares as compared to last year's 295.93 lakh hectares at the same time. In Maharashtra wheat has been sown in 4, 49, 966 hectares so far, which is 46.5 % of the Normal area. Last year at the same time wheat was sown in 4, 36,831 hectares. Maharashtra has set target of 10, 50,100 hectares. In Rajasthan wheat has been sown in 28, 20, 300 hectares so far, which is 100.7% of the target area. Last year at the same time wheat was sown in 29, 35,000 hectares.
- According to Trade sources, in Gujarat wheat sowing has been completed. In Saurashtra region area is less by 10-15% as compared to last year and overall area in Gujarat is 20-25% lesser than previous Year. Exporters like Cargill and LDC are buying actively but vessel is not available for immediate delivery.
- Trade sources revealed that sowing has been completed in M.P, Rajasthan, Gujarat and Punjab. Today rainfall was reported in wheat growing areas in Punjab, Madhya Pradesh and some regions of Rajasthan. Moreover traders expect new wheat arrivals in M.P from early March.
- Traders and Farmers revealed that sowing is almost complete in Kanpur region and Crop production is estimated to be lesser than last year as farmers have shifted to "Lai" (Rapeseed).

International Market Update:

- IGC estimates that total harvested area is expected to increase by 2.1% in 2013-14, the highest since 1998. Winter wheat condition is good in Europe but drought is still persistent in US HRW (Hard Red Winter) growing areas. World production estimate for 2012-13 has been increased from previous estimate of 654 million tonnes to 656 million tonnes as production is expected to improve in Australia, Canada, china and EU.
- IGC has estimated that world wheat trade will be 137 million tonnes as compared to previous estimate of 134 million tonnes in 2012-13 as Australia, Canada and India are expected to export more. No change is reported in Consumption; however carryover stocks have been increased by a million to 174 million tonnes. This might pressurize market.
- Argentinean Ministry of Agriculture has further reduced the crop estimate to 10.1 million tonnes from previous estimate of 10.5 million tonnes. Harvest is almost complete and production is estimated low as Yields in the main wheat region of the country did not reach what was estimated at the beginning of the season due to crop health problems, excess water in August, several heat shocks in November and bouts of hail and strong winds during the harvest.

Domestic market Outlook: We expect wheat Cash and future market to trade steady to weak.
