Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- **Govt.is heading towards using pulses stock procured during 2018-19 as buffer stock** sensing lower crop size this year. Instruction regarding this has been given to Nafed to transfer 1.4 MMT pulses to buffer stock. Notably, buffer stock of 2MMT was created 2 years ago to reign rising prices of pulses. However, higher production from last two consecutive years drag down pulses price considerably. Under this scenario govt. has to resort selling of pulses for various welfare schemes. Now lower production seems on the card and attempt to rebuild buffer stock started again to meet any eventuality at supply front in the second half of the year. It may lend support to cash pulses market to a certain extent.
- **Increasing fear of El-Nino and decision of transferring 1.4 million tonne pulses for rebuilding** buffer stock amid rough weather condition in major chana growing belts may support chana price at current level.. Arrival of chana in the mandis of MP and Rajasthan is expected to increase due to commencement of procurement at MSP. However, any major jump in chana price is unlikely in March. Chana in Delhi market is being traded at Rs4200-4300 per qtl. Steady to slightly firm tone may prevail in chana market this week. Demand is weak. As prices are ruling below MSP, farmers may release chana with slower pace. It may help market to recover.
- **Pressure on tur continues with increasing arrival from old and new stock amid weak demand.** Despite lower crop size tur market may extend its loss further by Rs 100-150. Weak demand, slower pace of procurement and availability of old stock remains unsupportive to cash market. Agriwatch expects demand to improve from mid April, by then maximum old stock is likely to be consumed. So, stake holders should resume buying from mid April, when crop from UP starts coming. Short term out for tur remains weak while medium and long term outlook seems bullish. Myanmar is offering tur at \$600 per MT basis Indian port. Crop damage in Myanmar would help market to move up in the second half of the year as supply side would be tight in Myanmar this year.
- **Weak demand, ample supply from imported stock and sluggish oftake from mills have pressurized urad** market. Urad have lost Rs 200-250 in last two weeks. At this level stockists have started stopping release of urad. Crop size is lower this year and if import flow is restricted beyond 1.5 Lakh tonne (likely), cash market is expected to recover from current level. Due to lower price, arrival in major markets has decreased amid continuous procurement drive. It may support urad market at current level. Stake holders should buy urad around Rs3900-4000 and hold it. Demand is expected to improve from mid April. Sale from central pool too would be restricted till Lok Sabha Election. So, price is expected to recover. In Mumbai market Urad is being traded at Rs4050-4075 while in Chennai market it is being traded at Rs4000-4100 per qtl.. Govt has estimated 3.36 million tonne for 2018-19 in the 2nd Adv estimate released on 28th Feb-2019. Private trade see it at higher side. It includes 2.68 MMT from Kharif and 0.69 from Rabi.
- **Moong cash market traded slightly up with ongoing procurement drive and restricted selling from** central pool stock. Demand is from stockists, not from millers. At higher level market may face demand crunch. So cash moong market may see downward correction once again. New crop from UP & Bihar is due and it may put pressure on moong price. Moong in Jaipur mandi is being traded at Rs5700-5800 right now and it may decrease by Rs 200 from current level. At this level there is no parity for export. Myanmar is offering moong at \$680 per MT. Supply side seems at ease right now.
- **Govt has released 2nd Adv. estimate for foodgrains on 28.02.2019. As per the latest adv estimate** tur production has been pegged at 3.68 million tonne against target of 4.5 lakh tonne for 2018-19. For chana it has been pegged at 10.32 million tonne against target of 11.50 million tonne. Urad production has been estimated at 26.8 in kharif and 0.69 in rabi season. Total production has been pegged at 3.36 million tonne. For moong it has been pegged at 2.41 million tonne including 0.57 million tonne rabi. Lentil production has been pegged at 1.53 lakh tonne. Total pulses production has been pegged at 24.02 million tonne.
- **Lentil market is likely to stay steady to weak in near future. Crop arrival is expected to be delayed** due to rains in past week. There is no export demand from Bangladesh due to difference in buyer/seller bids. NAFED has stopped sale of masoor. Furthermore, Masoor crop is weak this year, which would lead to lower production. These developments have provided some support to domestic prices and meet shortages, if any, in MY 2019-20. Market is likely to fall by Rs 200-300 per quintal on low demand and fresh arrivals.

- **DGFT has separated HS code for moong and urad now. Before this HS code for urad and moong was 07133100. Now it is 07133110 for urad and 07133100 for moong. It would now make it easy to quantify import-export of both commodities.**

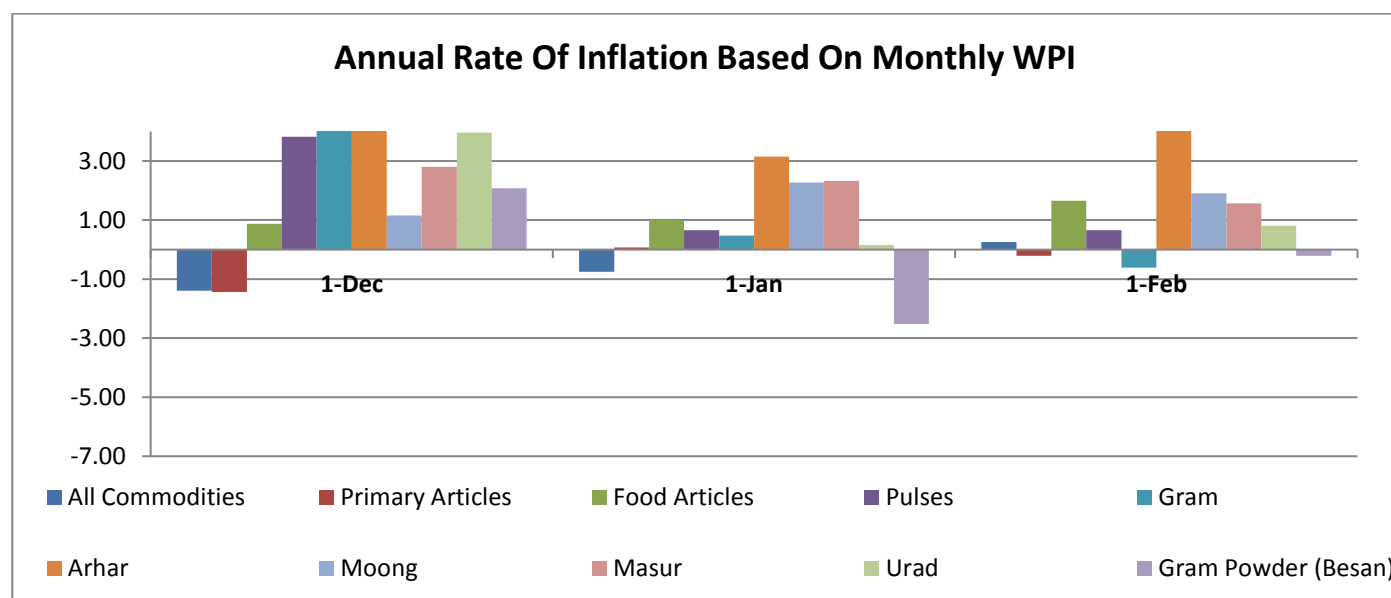

International Market:

- **Adverse weather condition at this point of time in Myanmar is likely to affect Tur and urad crop.** Despite good area coverage this year production is likely to decline by 15 to 20 percent this year. Lower crop in India this year and weak prospects in Myanmar may push tur market smartly up in the second half of the year. Farmers in Africa too have planted lesser area this year. So, pulses market may find good support in 2nd half of the year.
- **Lentil production in US is slightly down to 381384 MT against 339381 produced last year.** Earlier USDA had projected 398384 MT. Despite lower area coverage by 1.1 million acres, production increased due to better growing condition this year. Average yield increased from 678 pounds per seeded acre to 1,078 pound per acre. US mostly produces green lentil and it is facing challenge due to surplus production in Canada and other parts of the world.
- **All U.S. chickpea acreage increased from 625,500 acres in 2017 to 859,600 acres in 2018; 636,900 acres in large, and 222,700 in small.** Now we know where the lentil and dry pea acreage went; chickpea acreage increased by nearly 38%. As a result of a significant increase in yield, from 1,155lbs/ac average in 2017 to 1,512lbs/ac in 2018, production jumped from 320,100 MT in 2017 to 577,967 MT in 2018, an 81% increase in U.S. chickpea production! To break that down, chickpea production increased by 86%, while small chickpeas increased by 66%.
- **Chickpea export from Argentina increased in Jan-2019 in comparison to Dec-2018 as per latest update by Instituto Nacional de Estadística y Censos.** It has exported 7,559 MT in Jan against 5233 MT in Dec. Thus total sales during the MY reached to 141309 MT. However, it is lower by 15% from last year. UAE brought 1,698 MT, followed by Spain at 1,098 MT. Others countries have brought 1,824 MT.
- **Chickpeas production in Canada is expected to decrease from 311 to 130 thousand tonne in 2019-20.** Area under chickpeas too may decline from 176 to 74 thousand ha in 2019-20. Import is expected to decline from 25 to 18 thousand tonne. Thus total supply would decrease from 350 to 343 thousand tonne. However export volume may increase from 90 to 100 thousand Tonne. Carryout stock is expected to decline from 195 to 175 thousand tonne in 2019-20. Price is expected to hover in the range of \$520 to 550 per MT as per Statistics Canada and Agriculture.
- **Canada & US are going to object import restriction imposed by India in WTO.** As per Commerce Ministry Official, both the countries are against the quantitative cap on imports of pulses. This, is the second objection in WTO against India. Earlier, both the countries had objected under-reporting of market price support for five varieties of pulses under the minimum support price (MSP).
- **Lentil production in US is slightly down to 381384 MT against 339381 produced last year.** Earlier USDA had projected 398384 MT. Despite lower area coverage by 1.1 million acres production increased due to better growing condition this year. Average yield increased from 678 pounds per seeded acre to 1,078 pound per acre. US mostly produces green lentil and it is facing challenge due to surplus production in Canada and other parts of the world.
- **Lentil production in Canada, is expected to decrease by 18% to 20.98 lakh tonne due to lower harvested area and yields.** Large green lentil production is estimated to have risen from last year, to 6 lakh tonne while red lentil production fell to about 12 lakh tonne. Production of the other types of lentil is estimated to have risen to 3 lakh tonne for 2018-19
- **Pea production in Canada is expected to decline from 41.12 to 35.81 lakh tonne in 2018-19 due to lower harvested area,** particularly in Saskatchewan and Alberta despite similar yield seen last year. Out of total, yellow peas production may touch 30 lakh tonne, while green pea at 4 lakh tonne. There are other varieties. Supply side has decreased slightly from 44.24 to 42.26 lakh tonne due to higher carry in. Average price may be hinged at \$240-270 per MT in 2018-19. Crop year is Aug to Jul in Canada.
- **Chickpea area in Australia is expected to decline by 70.70 % to 3.27 lakh ha in 2018-19.** It was 11.16 lakh ha in 2017-18. Production has been pegged at 3.51 lakh tonne, lower by 69.43% from last year (2017-18). Lentil area is expected to

decline by 15.86% to 2.97 lakh ha in 2018-19. It was 3.53 lakh ha in 2017-18. Pea area is expected to decline by 23.42% to 1.70 lakh ha in 2018-19. Production is likely to decline by 28.03 % to 2.08 lakh tonne.

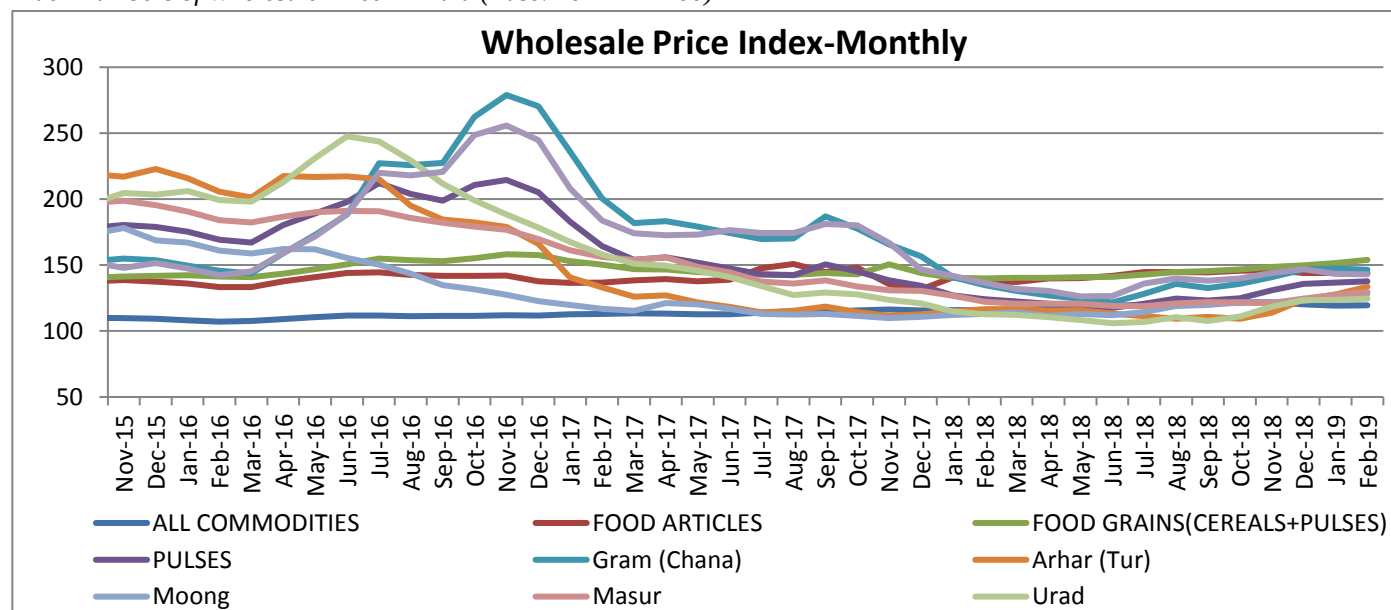

Monthly Outlook: -Pulses are likely to trade slightly firm.

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 0.9 point from 136.7 in Jan to 137.6 in Feb-2019

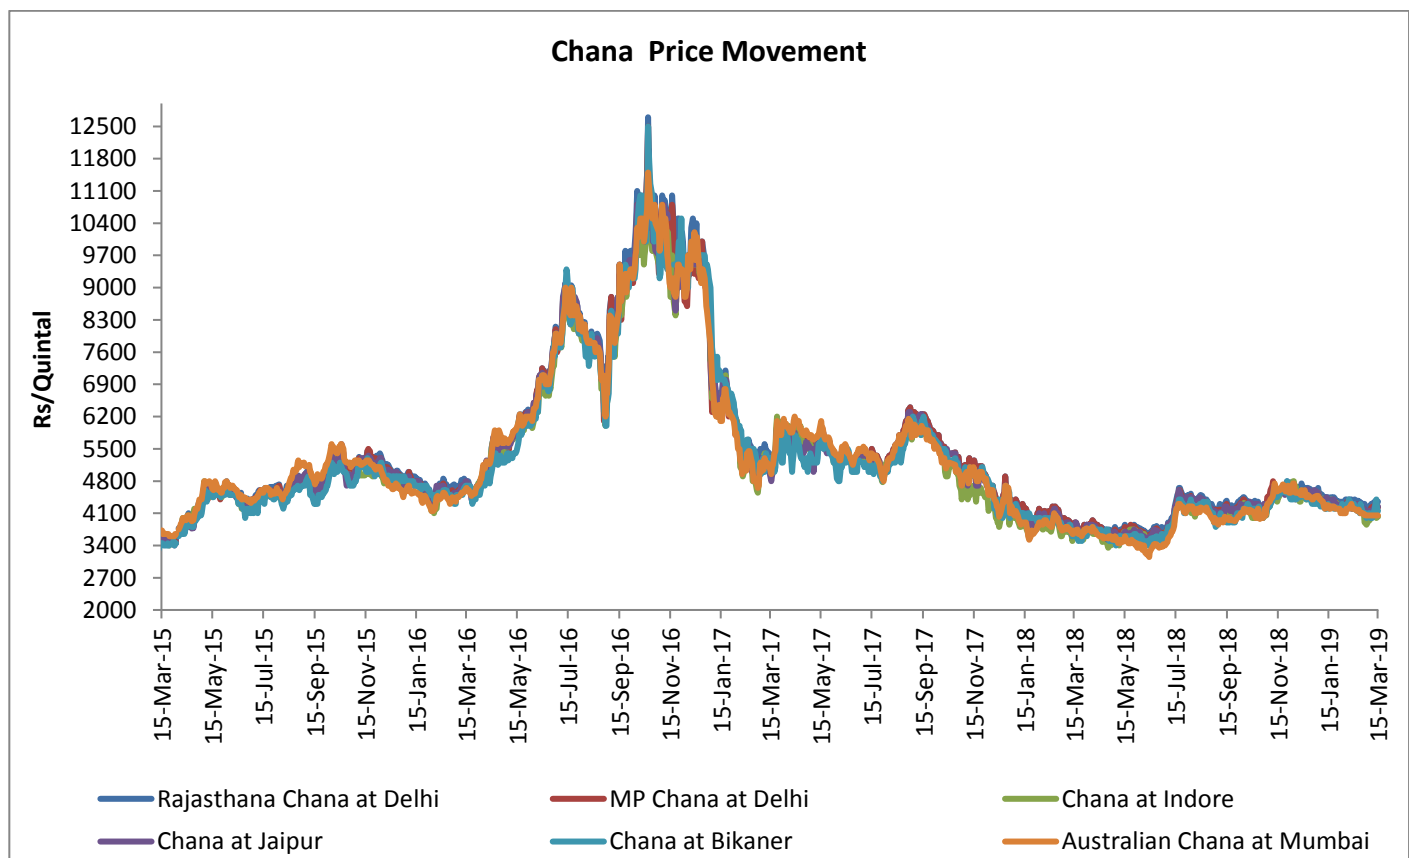

Pulses-Wise Scenario:

Chana

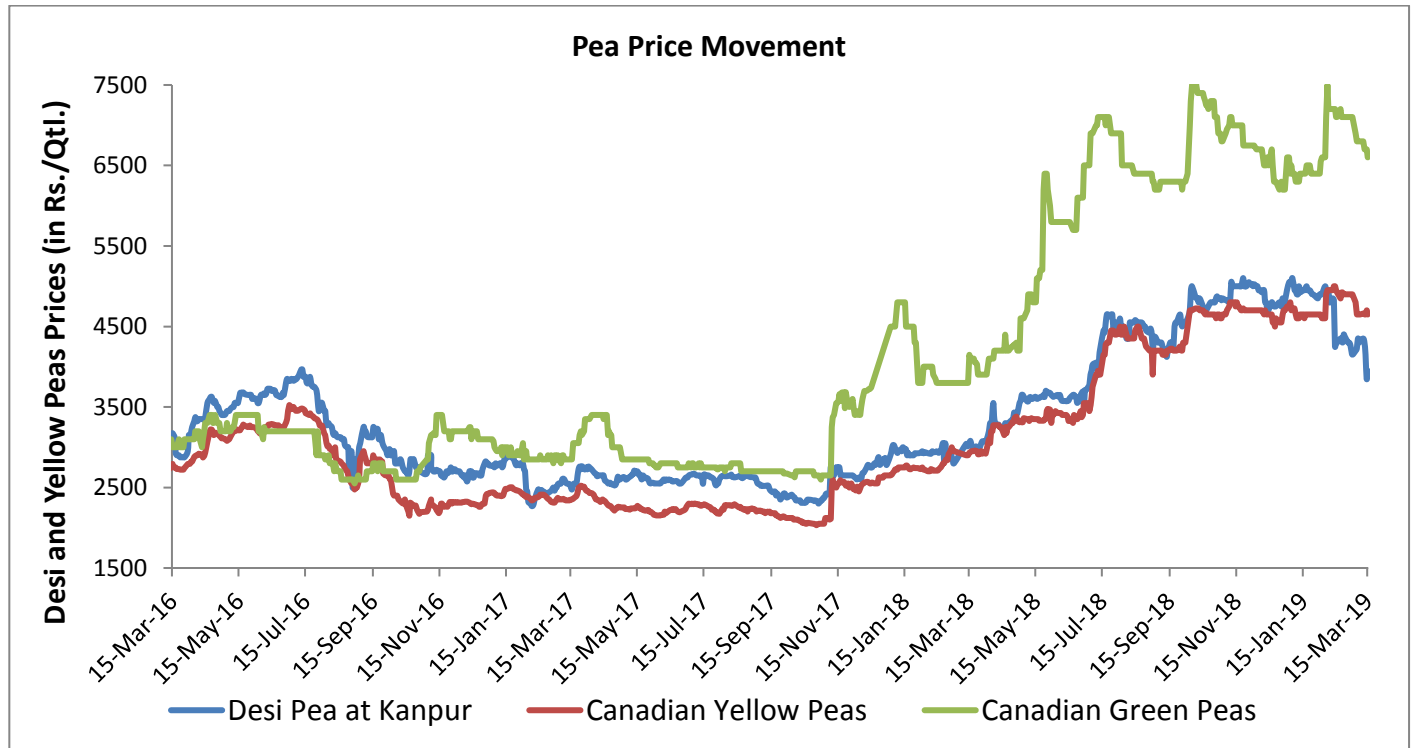

Current Scenario:

Cash chana market is likely to recover due to slower pace of arrival. Farmers are unwilling to sell chana below MSP and procurement is expected from 25th March in MP and Rajasthan, the growing states. In other major state like Maharashtra, crop size is almost 30 % lower and procurement drive is on there. So, chana market is expected to improve from here. Besides, re-building of buffer stock and decision of transferring pulses stock (1.4MMT) from Nafed to buffer stock too have capped market to slide further. So, chana market may improve in the short term. In Delhi market it may touch Rs 4300-4400 in coming weeks. However, any major spike is unlikely as availability is good at this point of time and buyers/sellers both are waiting for a clear direction. In normal condition market would move to Rs 4500-4600 in mid-April/May. Import is not possible. Sudan offers chana at Rs 3950 at Indian port and some buyers are still active.

All India average price for Chana traded up by 2.49 to Rs 4228. However, Australian chana price traded unchanged at Rs 4050 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Market Outlook: Chana may trade steady to slightly firm this week.

Peas (Matar):
Market Recap:

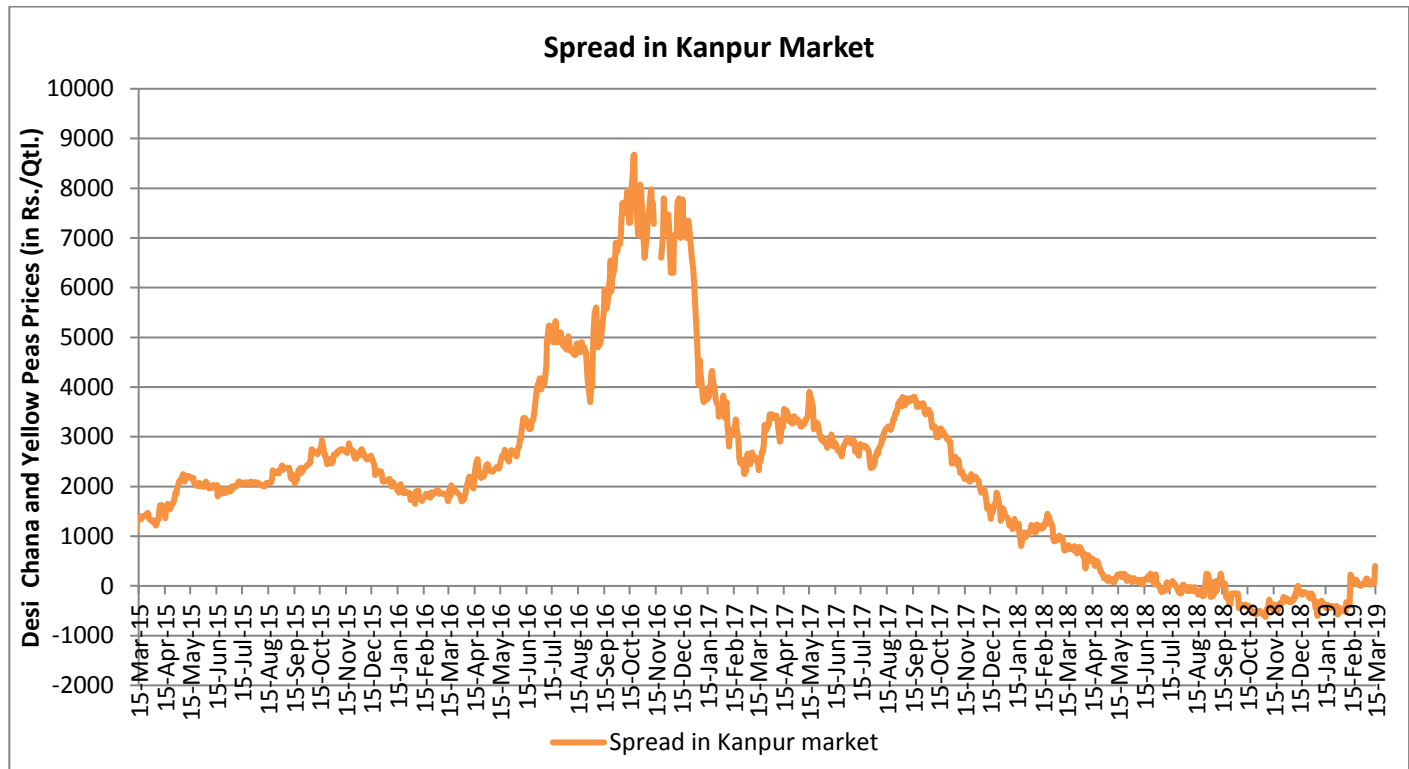

Pea market traded weak as expected last week and pressure would continue on cash market due to poor offtake and new arrivals. It would ease supply in domestic market. Pea in Mumbai market is being traded at Rs. 4650, while in Kanpur market it is being traded at Rs 3950 per qtl. As chana price is decreasing and new crop is at hand, any firm momentum in pea market is unlikely this week too. New crop in local market too has started hitting mandis now.. Govt has already extended import restriction from Dec to March 2019 and it may help market to sustain around current level.. Besides, pea in green form is available in local market and it is available at Rs10-15 per kg. Overall sentiment remains weak. Area under pea is almost 11.36% higher this year at 10.45 lakh ha.. Overall tone remains weak in the near term. Selling on higher level seems good on rise. Govt policy for next quarter too would be price driving factors. If import limit is increased, it would ease availability.

Current Market Dynamics & Outlook:

Pea traded at Rs3900-3950 in Kanpur market, almost Rs250 down from previous week due to weak demand and lower price for chana despite decreasing stock at port and import restriction. Market has already taken account of impact of extension of import ban till March-2019 amid lower stock at port. Consumption of pea in besan is weak as chana is available at cheaper price. In short term, demand is expected to remain weak due to higher availability of green vegetable and weak chana market. New crop has already commenced. The govt may increase import limit to 2 lakh tonne from April-2019. The move is said to be under consideration.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market, has started moving in positive zone due to decreased pea price in Kanpur market. Spread is expected to remain in the positive zone of 300-500 in March on relative movement in Chana and pea price.

Market Outlook: Outlook remains steady to slightly weak this week.

Lentils (Masoor):

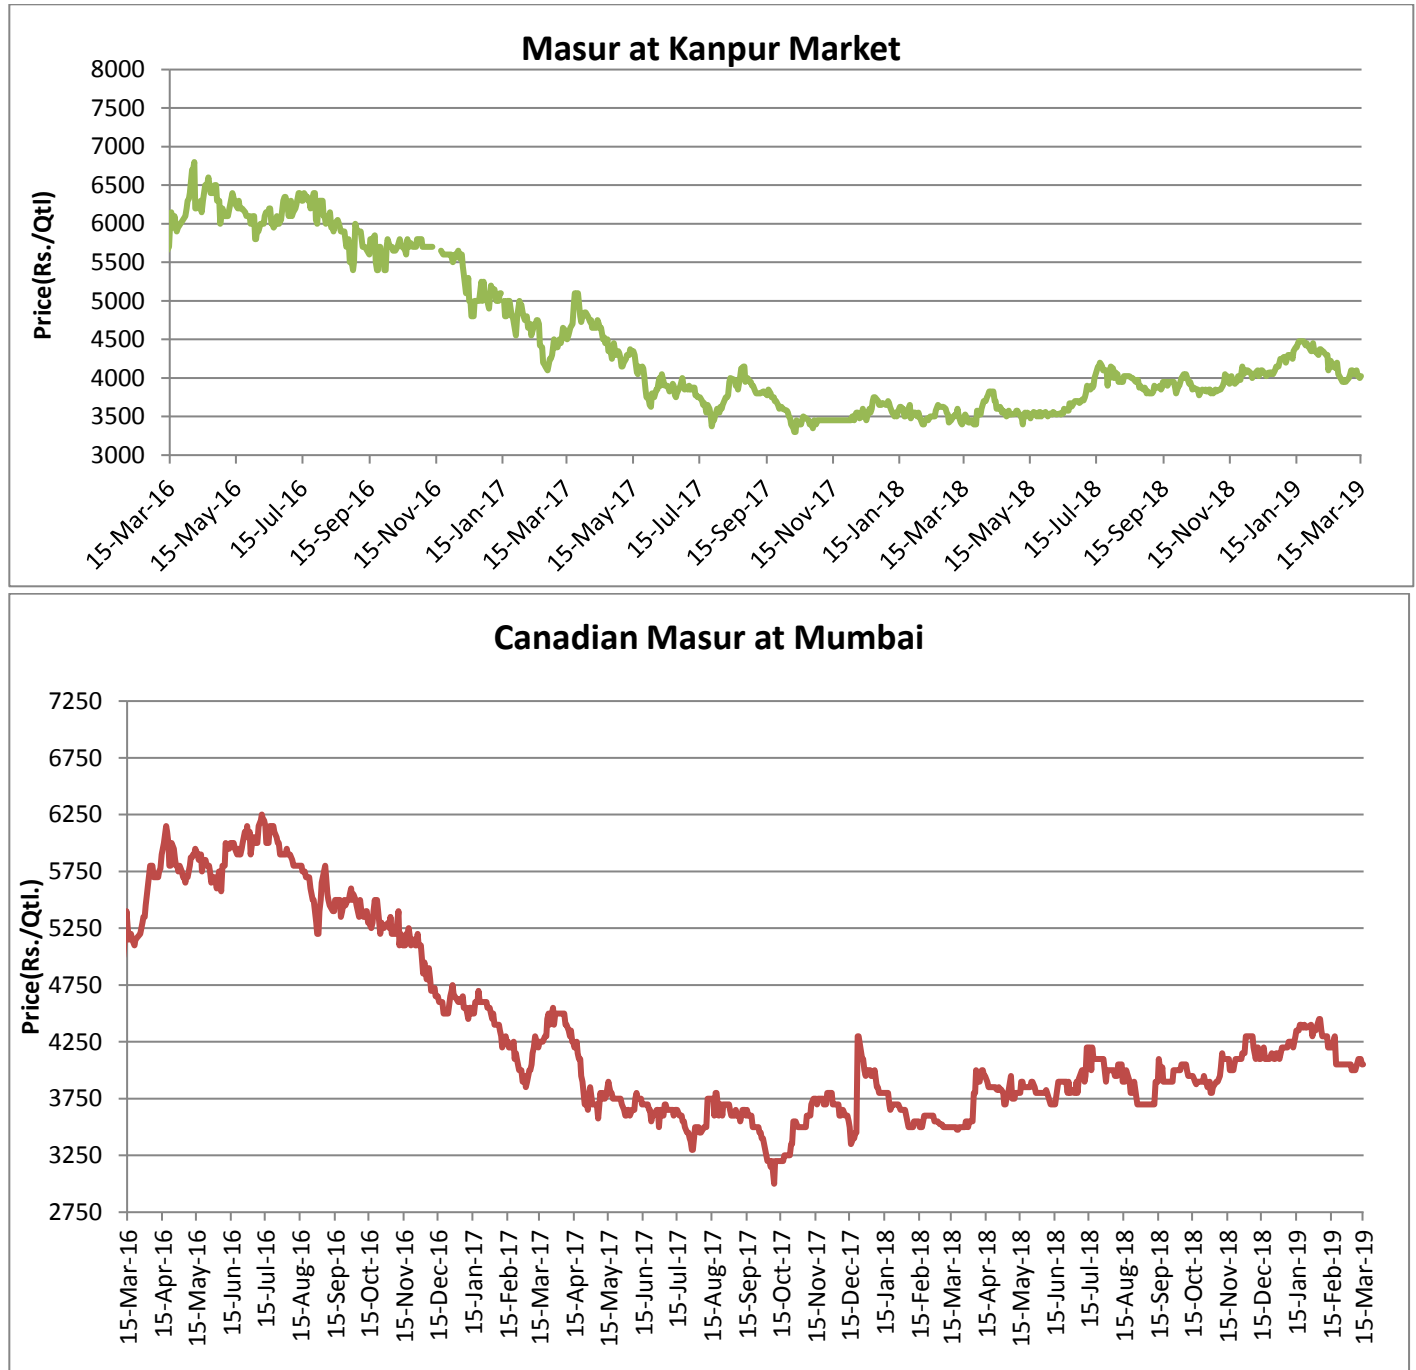

Market Recap:

New crop started arriving at mandis of MP and Uttar Pradesh. It is expected from Bihar now. However, delayed harvesting has capped downward trend. Demand from Kolcatta and Nepal is weak and it remains un-supportive to cash lentil market. Weather for next 10 days remains very crucial for lentil market. If turns rough and hail storm occurs again, some cap on decreasing trend might be seen. Procurement drive may help market to recover slightly this week. Cash market may improve from here. However, demand is weak. Cash market may trade in the range of Rs3800-4100 this week.

Current Scenario:

In the 2nd week of March-2019, average price in key market like Kanpur was down by 0.61 % to Rs 4035 per qtl. Prices are likely to trade range bound in March to a certain extent. New crop will be available in domestic market from end

of this month. New arrival started clicking in Ganj Vasoda and Pratapgarh. So any unexpected spike is unlikely at current level. Masur may trade in the range of Rs 3800-4100 in the near term.

Market Outlook: Prices are likely to notice firm movement due to procurement drive and lower arrival.

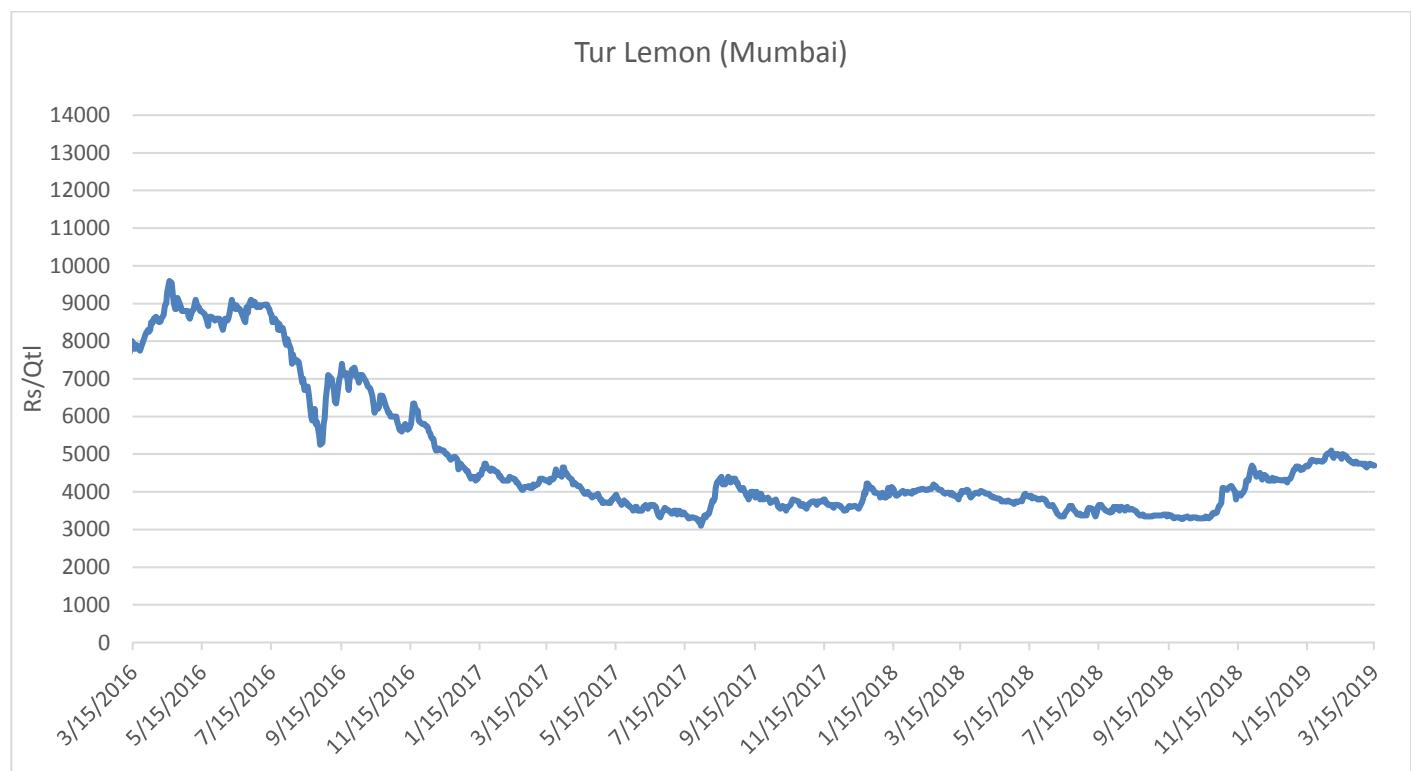

Pigeon Pea (Tur/Toor):

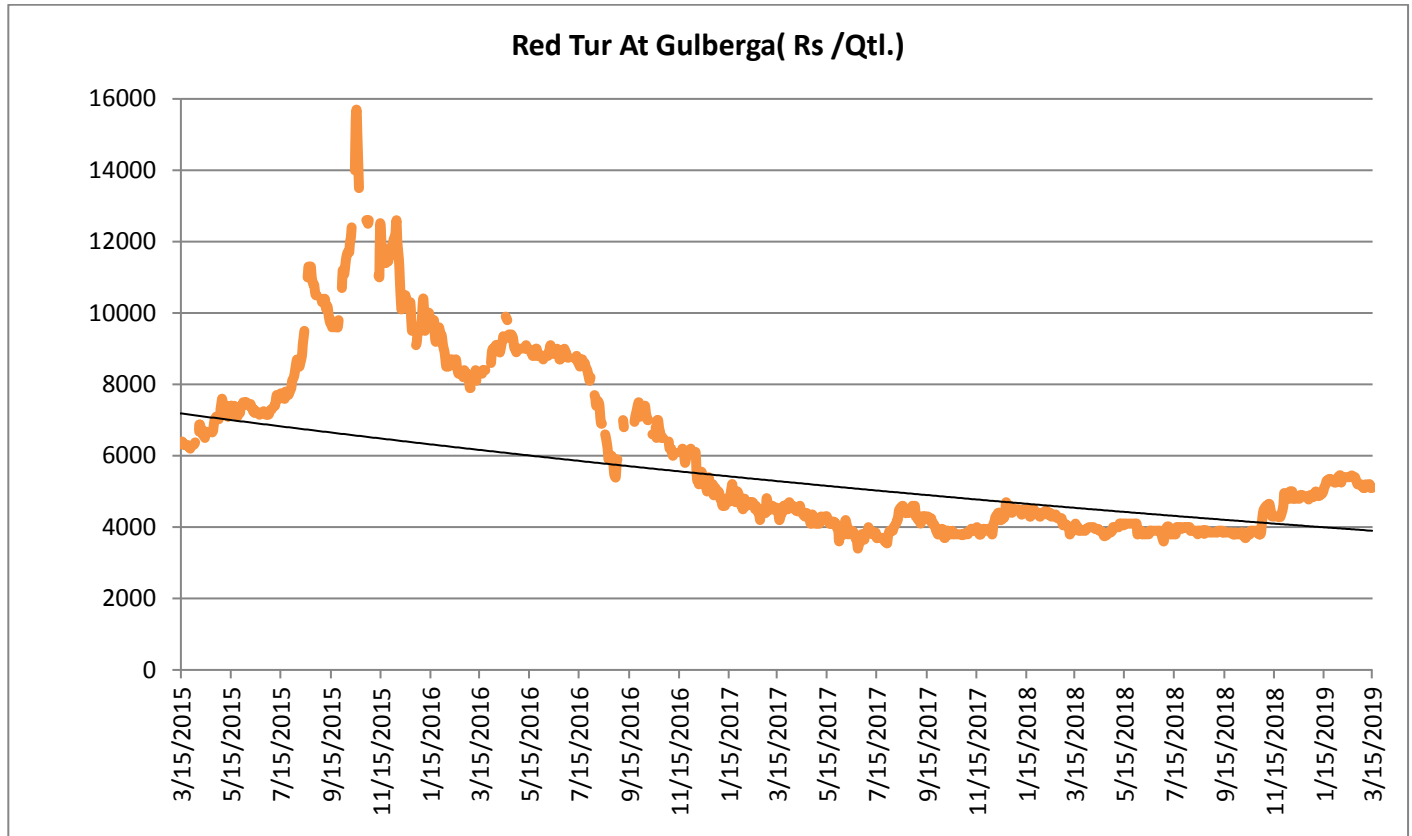

Market Recap:

Tur traded weak with increasing arrivals in major markets amid slower pace of procurement by various agencies. Total procurement by Nafed, has reached at 1.44 lakh tonne. Arrival pressure is likely to continue amid restricted buying by private trades. There is a common view in the market that tur price may go down by Rs100-150 more from current level as bulk users demand remains sluggish at this point of time. However, any major (??) is unlikely as crop size is lower this year. Agriwatch estimate for tur production is 36.21 lakh tonne for the year while govt.'s 2nd adv estimate released on 28th Feb has put it at 36.8 lakh tonne. As carryout is higher, any major jump from current level is unlikely. Market is awaiting demand. Currently tur market is being traded at Rs 4900-5100 in Gulberga market. This week it may trade slightly lower. Myanmar is offering tur at \$600 per MT. Total procurement from kharif-2018 has reached 181112.60MT as oo 13th March-2019. Overall tone remains weak

Current Market Dynamics & Outlook:

Tur market is expected to stay steady to slightly weak due to poor demand and increasing arrival in major markets. Buying by private trade remains restricted. However, medium term outlook remains firm due to import ban till March-2019 and lower crop size (36.21 lakh tonne). Stake holders should buy on correction.

Market Outlook: Tur market may dip by Rs100-150 more with increasing arrivals.

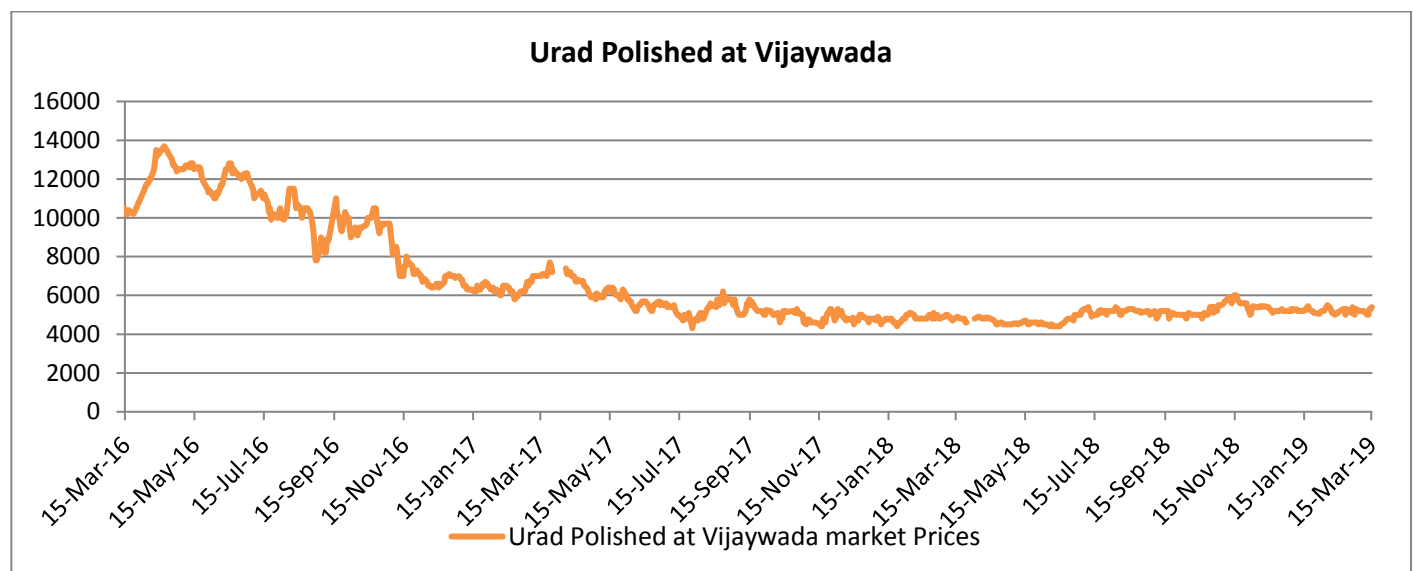

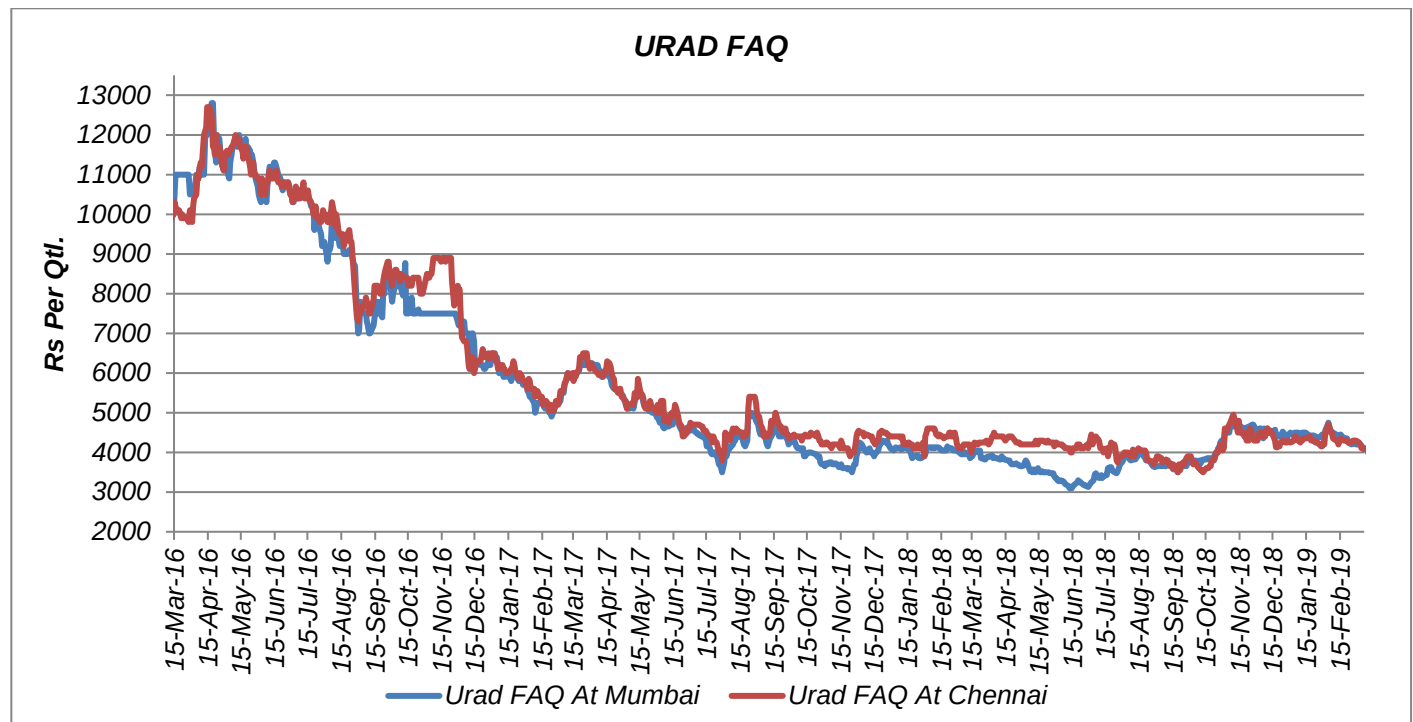

Black Matpe (Urad):

Urad market traded almost steady during the month under review. Slackened demand from mills and higher production adv estimate amid higher carryout have capped market at current level. Govt has estimated 3.36 million tonne for 2018-19 in the 2nd Adv estimate released on 28th Feb-2019. Private trade, see it at higher side. It includes 2.68 MMT from Kharif and 0.69 from Rabi. Despite lower crop size from kharif, carryout is at higher side and it may restrict uptrend in coming weeks. With opening of weather, demand is likely to improve. With ongoing procurement drive, any major decline is unlikely. Urad may continue to trade at Rs4000-4400 per qtl in various markets. In Chennai market urad is being traded at Rs4000-4150 per qtl. Burma is offering FAQ urad at \$490 & SQ at \$600 per tonne. Imported stock too is capping market to get firmer. Steady tone may prevail in urad cash market in March too. Buying at dip seems good. Burma is offering FAQ urad at \$465 & SQ at \$575 per tonne. Imported stock too is capping market to get firmer. Steady tone may prevail in urad cash market.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs Rs4000-4100 per Qtl.) and Chennai (Rs.4050-4150 Qtl.) noticed weak tone. It traded down in Vijaywada too. Improvement might be seen in Urad market once again after slight correction and opening up of

weather. Demand is likely to increase from mid March .The following graph shows the prices movement in different markets:-

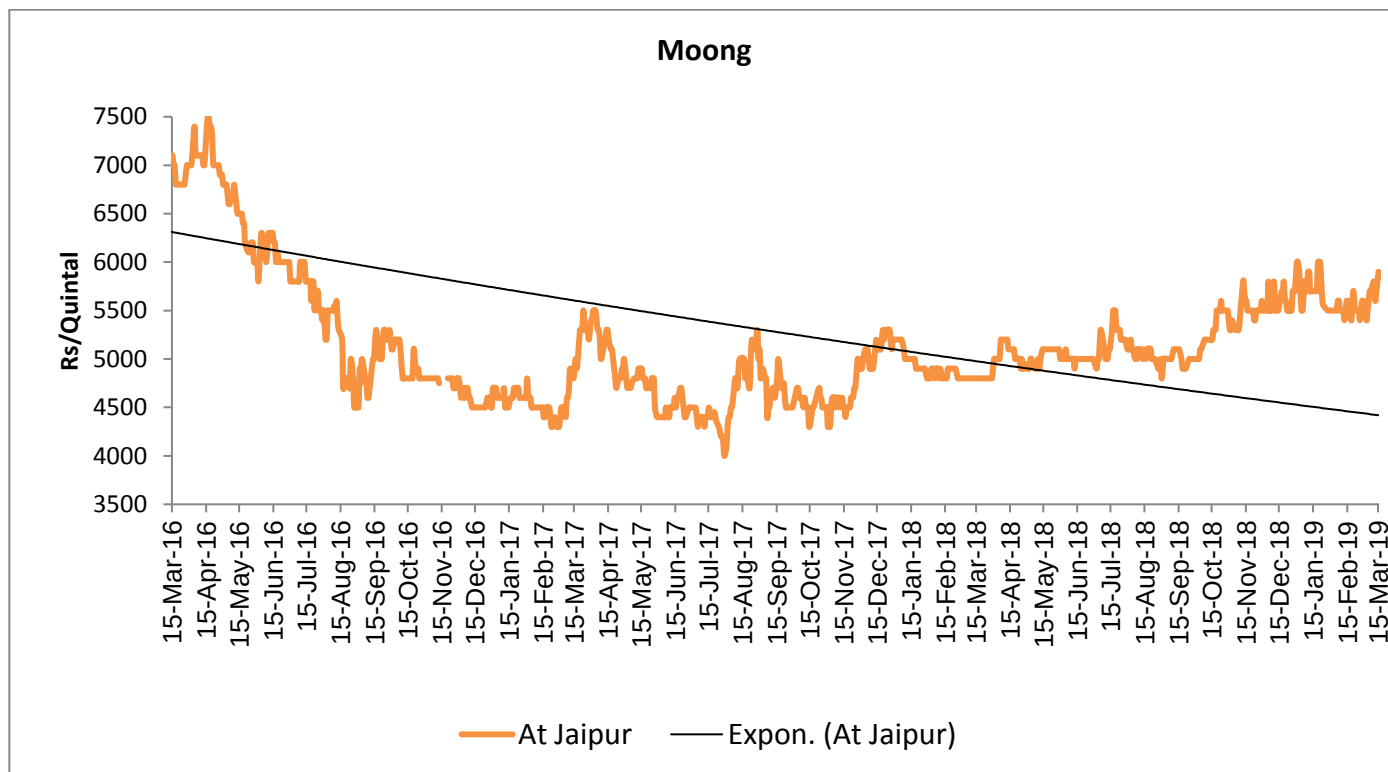

Market Outlook: Urad Prices are likely to show steady to slightly firm momentum this week

Green Gram (Moong):

Market Recap:

Demand for moong dal remains affected from cash market. Bulk buyers are unwilling to buy at higher level and fulfilling their immediate requirements. Supply side in domestic market is at ease against weak demand. So, any major jump is unlikely in moong market despite restricted supply from Rajasthan, Gujarat and MP line. Moong is being traded at Rs 5400-5500 in Jaipur market. It may dip by Rs100 more from current level. New crop from UP and Bihar is expected from March end. So steady to slightly weak tone may prevail this week too. Moong would continue to trade in the range of Rs5400 to Rs5800 in Jaipur market. Myanmar is offering moong at \$680 per MT.

Market Outlook: Moong prices are likely to trade range bound in the near term.

Pulses Wise Technical Outlook For The Week:-

Chana:

Outlook –We expect prices to move steady to slightly firm in the coming days.

- ❖ Chart depicts steady to slightly firm movement in March.
- ❖ RSI is moving up in neutral region.
- ❖ Expected price band for Chana in Delhi is 4150 to 4350 levels in this week..

Strategy: Buy on dip

Trade Recommendations: Go long around 4200 with the first target of 4300 and second target 4350 with stop loss at 4150 level.

Delhi Chana Physical:

Support & Resistance				
S2	S1	PCP	R1	R2
4000	4100	4225	4350	4450

Spot Market outlook: Chana prices are likely to show steady to slightly firm movement this week.

Peas:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook - We expect prices to notice weak movement in this week taking clue from weak chana,. Weak demand despite decreasing stock at ports may cap uptrend.

- Candle stick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 3700- 4100 in this week

Strategy: Sell on rise

Trade Recommendations: Go short around 4700 with the first target of 4500 and second target 4400 with stop loss at 4800 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4300	4400	4650	4800	5100

Masoor:

Desi Masoor (at Kanpur) Spot Market Weekly Chart:

18 March, 2019

Outlook –Steady to slightly weak movement is likely to be noticed in coming week.

- Chart depicts steady to weak movement in the market.
- RSI oscillator is moving up in neutral region.
- Expected price range is 3900-4100

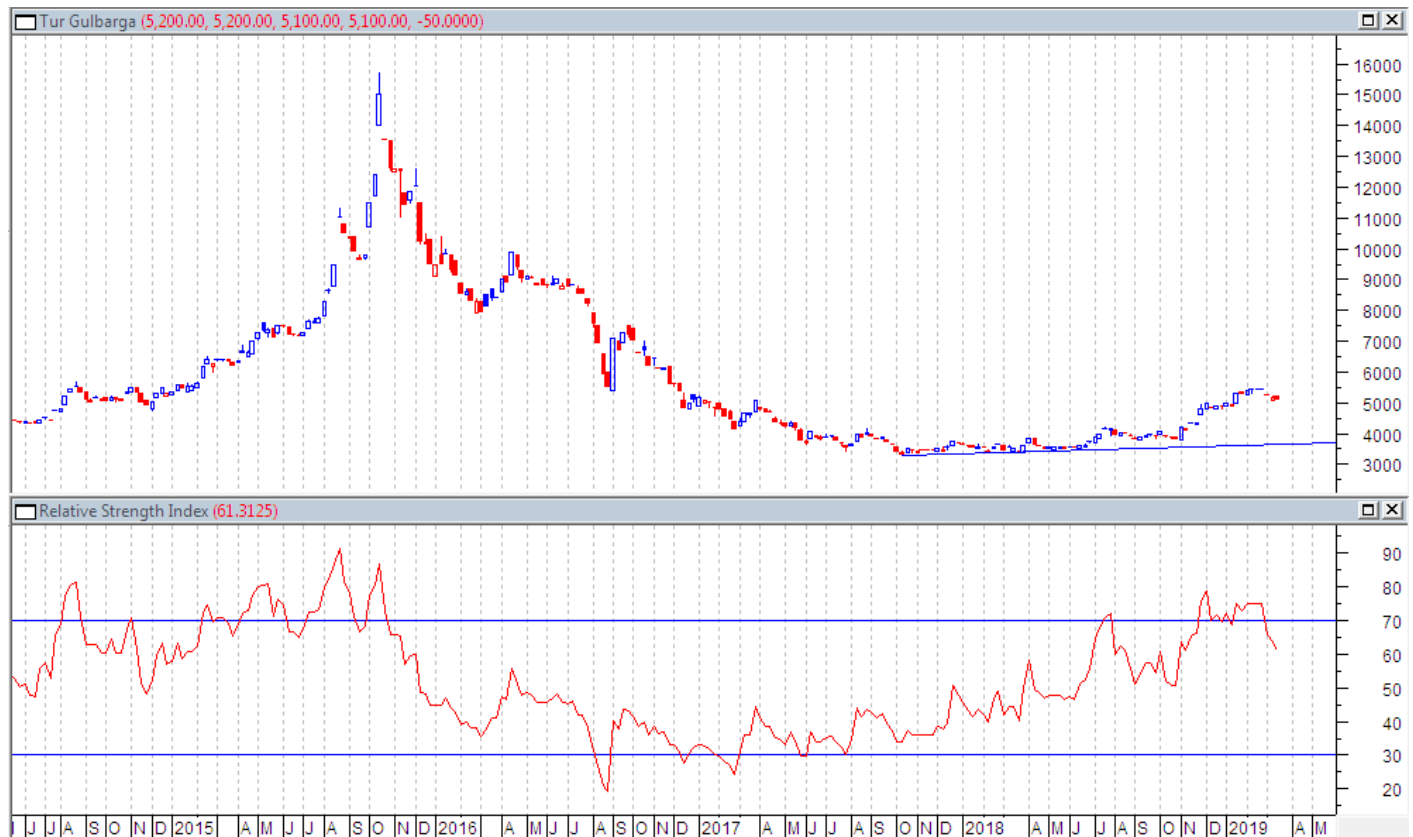

Strategy Sell on rise

Trade Recommendations: Sell around 4100 with the first target of 3950 and second target 3900 with stop loss at 4200 level.

Support & Resistance				
S2	S1	PCP	R1	R2
3800	3900	4025	4200	4350

Tur:

Tur (at Gulbarga) Spot Market Weekly Chart:

Outlook - We expect prices to show weak movement in the coming week.

- Candlestick chart denotes weak movement in the market.
- Oscillator RSI is moving down in neutral region.
- Expected price range is 4800-5200

Strategy: Sell on rise

Trade Recommendations: -Go short around 5150 with the first target of 5000 and second target 4900 with stop loss at 5200 level.
