

Pulses Domestic Fundamentals:**Today's Update:**

- **Indian farmers have covered 36.84 lakh ha area under kharif pulses as on 1st July-2020.** It is much higher than 9.47 lakh ha covered last year till date. Farmers have covered 16.56 lakh ha area under tur against 2.79 lakh ha last year. Urad coverage area has been reported at 8.77 lakh ha against 1.88 lakh ha last year. Farmers have covered 9.41 lakh ha under moong against 3.14 lakh ha last year. Even other pulses area are running ahead of normal schedule. Weather remains favorable and sowing is on with faster pace. Kharif area is bound to increase this year. See details in table at page no-3.
- **Govt. has targeted to build up around 20 lakh tonne buffer stock of pulses for Apr to Mar-2020-21 period.** It was 1.6 MMT last year. As per the latest official release the buffer would consist of 10 lakh MT Tur, 4 lakh MT urad, 3 lakh MT chana, 1 lakh MT moong and 1.5 lakh MT masur. Right now govt. has around 34.5 lakh MT (including rabi and kharif) pulses available in its go-downs. Govt. has increased buffer limit as it has to distribute pulses to common man free of cost during COVID-19 pandemic. Under this plan govt. provides 5 kg of wheat or rice and 1 kg of pulses every month to around 814 mln poor people for free. It is in addition to the 5 kg of subsidized rice or wheat that people get under National Food Security Act.

Previous Update:

- **Pressure on cash moong market continues with increasing quantity from summer moong.** Buying support by mills was limited as quality of more than 50 % arrival was weak. Moong is hitting various markets from MP, Rajasthan, Uttar Pradesh, Bihar and Ranchi region. Weak demand, arrival of light quality moong may drag down moong price by Rs200 to 300 more from current level. Apart from this sowing of kharif moong is running ahead by 3.24 to 5.30 lakh ha. This year area is bound to increase and it may cross 33 lakh ha against normal of 27.50 lakh ha. Before this maximum area has been covered in 2016-17 (Over 35 lakh ha). Weather condition is favorable and good rains fall and higher MSP in growing region are encouraging farmers to grow more moong this kharif season. Under normal condition Agriwatch expects 14.25 to 14.50 lakh MT kharif production as per preliminary estimate.
- **Importers have restricted buying of masur from Canada from the third week of June.** Likely lower import volume in July and decreasing arrival flow from Mungawali, Ganjwasoda, Sagar and Bhopal in domestic market may push up masur price in coming weeks. Around 30 to 40 thousand MT is expected in July while buyers of around 50000-60000 MT are ready to buy. It means higher demand against lower supply. Supply shortage is bound to support masur market fundamental. Even nafed is unable to buy masur this year as prices are ruling above MSP. Even import duty reduction of 20 % is unable to cool down price as suppliers' countries like Canada and Australia had increased their quotes accordingly on same date. There is a shortage of masur at ports like Mumbai and Mundra..
- **Tur market started trading firm in domestic market due to stockiest active buying sensing uptrend** to continue in coming months. Market is well aware that stock of imported tur is lower at ports and demand is likely to improve in coming weeks due to commencement of festive season. Apart from it, Millers from Katni are buying Tur from Karnataka and MH. As supply side is getting tighter, stockiest have increased their buying throughout India. Demand for dal is normal right now, but will bound to improve. MH tur in Katni is being quoted at Rs 6250 while Kar tur at Rs 6325.
- **The DGFT has cleared that India would import 2 lakh MT pulses including tur from Mozambique in 2020-21** under previously signed pact. Import would be allowed on 5 ports I.E Mumbai, Tuticorin, Chennai, Kolkata and Hazira. Import will be subject to production of "Certificate of Origin" certified by the authorized signatories in the ICM (Instituto de Cereais de Mozambique) with stamps provided by the Government of Mozambique, which is being shared with the concerned customs authorities of these ports and the Central Board of Indirect Taxes and Customs.
- **The DGFT has decreased the time line for 4 lakh MT urad import quota from 31st March-2021 to 31 August-2020.** As time frame for import has been reduced, The DGFT would issue license soon (June). It would impact the market sentiments and cash market would trade down by Rs200 to 300 from current level. Notably, import of back

log is yet to hit Indian ports. The time line for back log import for ongoing MY has been extended till 31st May-2020. Besides, new kharif crop would be available from Aug. So pressure seems building on urad price..

International Market Update:

- **Lentils area is expected to decline slightly from 1530 thousand ha to 1501 thousand ha in 2020-21.** the decline is nominal so production size is estimated to be similar as seen in 2019-20. Canada had produced 21.67 lakh MT lentils in 2019-20. the fig for 2020-21 has been pegged at 21.50 lakh MT. Yield is similar for both years at 1.46 tonne per ha. import and export fig too may decline in 2020-21 and it may come down from 85 to 50 and from 2200 to 2000 thousand MT respectively. Price is expected to hover in the range of \$500-530 per MT.
- **Dry peas export from Canada is expected to increase from 32.70 lakh MT to 36.50 lakh MT in 2019-20 and it may decrease to 34.00 lakh MT in 2020-21.** For 2020-21, it is preliminary estimate as crop sowing has just ended in mid June-2020. China, India and B, desh have been top buyers of dry peas in 2019-20 and the increased volume of total export shws the same. Even import figure is up from 62 to 72 thousand toone in 2019-20. It may decrease to 60 thousand MT in 2020-21.
- **Dry peas production in Canada is expected to increase from 35.81 lakh MT in 2018-19 to 42.37 lakh MT in 2019-20.** Based on preliminary area and yield estimate production in 2020-21 may increase slightly from 42.37 to 42.75 lakh MT. Seeded area in 2020-21 is 1732 thousand ha in 2020-21 against 1753 thousand ha in 2019-20. The yield of dry peas is expected to increase this year from 2.48 to 2.51 tonne per ha in 2020-21.
- **Lentils stock in Australia is decreasing fast as bulk shipment to B, desh continues with next three months forward deal was heard.** Old crop of lentils would not be available by the beginning of the new season. Forward quotes have been heard at \$700-800 per MT, but limited quantity limits the deal too. B, desh has been buying 20,000 MT red small lentils per month. It may continue next three months. Australia exported 80,000 MT lentils in March and big volume export continues in April and May too. So old stock is depleting fast. As prices are moving up, area under lentils may increase by 10% this year. New lentils quotes are \$650-700.
- **Moong harvesting is on in Australia. It is almost two third over in Queensland and northern NSW.** Quality of moong is said to be good. Mungbean values have steadied at \$1500/t for No. 1 grade, \$1400/t for manufacturing and \$1300/t for processing as per Central grain Asia report. Quantity of grade -1 moong is higher. China is the biggest buyer of Australian moong. Some buying interest from India too has been seen. Indian millers can also buy moong from Australia if they get license. The central Queensland mung bean harvest is well advanced, and will finish next month.
- **Australia is going to plant biggest chickpeas crop in comparison to last three years.** Planting continues in Queensland and NSW. As moisture level in the field is good, farmers are increasing area under chickpeas. As top level soil moisture is lower, farmers are using wheat land for chickpeas planting. Forward delivery for October onward has been heard at \$ 630 per MT. New chickpeas crop may attract higher value. Value of new crop may be affected by any further hiccups caused by COVID-19. It may pressurize Chickpeas price.
- **As per latest report by Canada stats MY 2019-20 may end up with 3 lakh MT masur stock.** Sowing in new season i.e 2020-21 is almost over and under prevailing condition 21.5 lakh MT production is expected. If we assume 50,000 MT import in new season, it hints that total availability would be around 25 lakh MT. New crop is expected to hit market in Sep. As India has slashed duty by 20 % to 10%, Exporters in Canada has increased quotes accordingly. So, Indian importers are unlikely to gain benefit in import. Emerging situation is not favorable for import and Indian importers would not be able to import much masur till August. New quotes in Canada is \$670 per MT. Actually Canadian fig is doubtful and it seems manipulation here. So, exporters always take advantage of change in duty structure.
- **As per latest update by NASS, dry pea acreage may be down by 12-13% this year in US peas producing regions.** Farmers may plant total 971,000 acres against 11,03,000 acres last year. Intended plantings are down from a year ago in Idaho, Montana, Nebraska, North Dakota, and South Dakota. However, area in Washington may increase by 19% this year.

- **As per latest update by NASS lentil area may be down by 2-3% this year in US.** Farmers may plant total 474,000 acres in crop year 2020., down 2 percent from 2019. Lower area coverage is expected in Idaho, North Dakota, and Washington from last year, while planting intentions are above last year in Montana (7% increase).
- **Chickpeas area in the US is likely to decrease by 32% from last year.** Small chickpea acreage shows a decline of only 5%, while large chickpea acreage is expected to decrease by 41%. It is really a big surprise this year.
- **As per latest report by The Canadian Grain Commission Canada has exported 1,382,600 MT peas in ongoing MY** so far till Jan-2020. It is up by 45% from last year till Jan 2019. In Jan alone, total 1,34,300 MT has been exported. Canada has exported 1,036,800 MT last year till January-2019.

Weekly Outlook: -Pulses are likely to trade steady to slightly weak.
