In London, refined-sugar futures for March delivery rose \$25.40, or 3.2 percent, to \$824.50 a metric ton on NYSE Liffe.

Market Analysis

- Mixed sentiments occurs in the spot markets on Friday as demand and supply surge in various markets.
- According to News sources, India has no immediate plans to ban futures trading in any commodity.
- Sugar mills in India are staying away from raw sugar imports, due to negative processing margins.
- Sugar production in India's second-largest producer Uttar Pradesh up 11.6% to January 15.
- We are expecting that sugar production may increase up to 11.2 million tonnes until Jan 31 from Oct 1 for the current season.
- Govt. has declared India's subsidized sugar sales quota for the month of February which may decrease the prices further. February sales quota of sugar has been declined to 2,16,000 tonnes in comparison to 2,18,000 tonnes in January due to fewer festivals in February.

We expect that sugar prices remains in Negative bias in near term due to higher sugar quota for January and lack of demand in Physical Markets. After 10-15 days, demand may increase which may increase the sugar prices as market expecting export announcement in early Feb. However, estimates of sugar output both domestically and internationally may provide the actual direction to sugar prices in medium to long term.

Technical Analysis:

- As reflected in the chart sugar prices are in downtrend and moving in falling channel.
- Price trading below 9 EMA and 18 EMA which further indicates bearish.
- However, oscillators such as RSI and Stochastics are moving upward from oversold region.
- Selling towards resistance level will be the best strategy.
