

March 22, 2011

#### **Veg Oil Summary**

- ❖ Vegetable oil prices noticed mixed trend in the absence of buying support in the cash market on Monday.
- Cooling off in the recent demand in the oils capped gains despite higher Malaysian palm oil.
- ❖ Internationally, Likely drift in China's Soy oil Imports and pick up in Palm Imports may produce an offsetting impact where as pressure of Brazil and Argentina Soy harvest along with higher production projections for the upcoming season will continue to restrict any upside, led by temporary factors viz disruption in harvest due to rains in some parts of brazil.

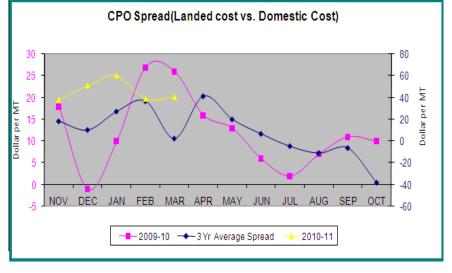

Soy oil prices eased followed by decline in the demand which was witnessed last week on the back of of the festival, Holi.

- Currently, normal demand in the soy oil is witnessed and the soy oil market tend to follow local mustard oil and seed market due with peak season in mustard seed.
- Reportedly Egyptian buyers purchased 40,000 tonnes of soybean oil.
- > Soy oil Imports get viable from Argentina, Brazil and US as depicted by negative price spread between Landed cost and domestic cost, calculated as on 16 th March 2011 based on FOB (April Rates).

India imported about 129,540 MT of soybean oil (degummed) in February this year compared to 88,258

MT in the corresponding period last year.

Soy oil monthly average spread (landed cost domestic cost) of \$50 per Metric tonne has a adverse bearing on Soy oil Imports, as depicted by the trend established based on spread and imports in the oil year 2009-10. Going forward in March this spread may reduce, based on 3 years average spread movement, the same is likely as FOB rates may continue to drift.

- > The average spread until March 15th hover at \$48.42 per MT, which still remain close to the higher limit and thereby unfavorable for soy oil imports but the likely ease of in the same in the rest of the day's of the month may bring in respite.
- Total Edible Oil shipments in March reach at 205255 MT until March 16th 2011: Out of the same CDSBO shipments stand at 29165 MT and Palm oil shipments stand at 161890 MT. Total Edible Oil Imports in Oil year starting Nov 2010 until March till date are likely at 2752143 MT.
- Palm oil price witnessed mixed tone in various centers on varied factors on Monday.
- > Exports of Malaysian palm oil products for March 1-20 declined 9.5 percent to 734,897 tonnes from 811,813 tonnes shipped during February 1-20 - cargo surveyor Societe Generale de Surveillance.
- CPO Monthly average spread (Landed cost vs. domestic cost for march 2011(until 17th) remain at \$ 40.45 per MT, which remain higher than the spread of \$28.77 in March 2010 until same date which remain unfavorable development for palm imports, in the said month but going forward, the spread may face a decline based on 3 years average move on account of further drift in the FOB Rates.
