

Price Drivers

- Record production. Gujarat starts procurement. Bonus offered in M.P. Favourable weather. Harvesting started in Maharashtra
- Harvesting in Punjab and Haryana is likely to commence on the first week of April.
- Decision on wheat export likely in April.
- Procurement target increased to 26.3MMT
- Pressure to offload wheat on FCI, Huge stock from last year crop in govt.'s granary.
- Short supply expected in the international market in medium term .Wheat crop in China under stress.

Analysis: Technical

- Candlestick formation shows sellers support in the future market with weak bias likely to continue in next trading session.
- Prices continue to test towards its resistance with dwindling volume indicating lack of adequate buying strength to breach its crucial resistance region of INR 1172.
- Even 9 day and 18day SMA hints further weakness in the market
- RSI is moving down in positive zone indicating further weakness in the market
- Wheat is likely to trade range bound with bearish sentiment in next trading session. So participants are suggested to go for selling at higher level.

Trade Recommendation: Wheat NCDEX (April)

Spot Market Fundamental

- Price of wheat (loose) has come down below MSP in Gujarat (Saurashtra regions) with increasing arrival. Pressure will continue to build up with the commencement of harvesting in U.P., Bihar, Maharashtra and Rajasthan followed by Punjab and Haryana. Prices may go down up to 8-9 percent in April from current level. Weather for harvesting is favourable and rising temperature is enhancing harvesting activities.
- This year higher arrival is expected from all major wheat growing states. Market is ruling above MSP right now due to various reasons like Rs 100 per qtl. bonus to wheat farmers in M.P., buying at higher prices by MNC's on hope of opening up export.. Decision on export is still pending and higher arrival in almost all markets is expected in April. This will create glut like position in mandis. If govt allows export, prices will remain stable near MSP,
- Punjab ,Haryana ,M.P., Rajasthan and U.P. is expected to contribute more wheat to central pool this year and will keep prices under pressure in weeks ahead.
- Expert say that around 1-3 million tons of wheat could be easily exported from India and it won't have any bearing on government's food stocks and grain availability. This is the best time to allow wheat exports as Indian wheat, which is comparable to Australian wheat, will fetch around Rs 15-Rs 16 per kilogram in the international markets.
- Govt. will start procuring wheat on 1st April in Punjab, Haryana and U.P on MSP. Procurement in U.P. may increase this year due to higher production. Even Gujarat may contribute more in this marketing season.
- India's Feb. 1 wheat stocks were at 19.4 million tons, substantially higher than a target of 8.2 million ton.
- India's wheat planting until Feb. 4 rose 3% from a year earlier to a record, brightening prospects of a bumper crop. The wheat sowing area increased to 29.45 million hectares from 28.32 million hectares, the government data showed. India, the world's second-largest wheat grower, aims to produce 83.69 million tons of wheat in 2010-11, up 3.3% from the previous year
- Global wheat production may rise by 4% to 672 million tons .As for India timing is most crucial given the high price of domestic wheat. While parity at the current levels is achievable, margins will evaporate as the global wheat prices decline and the window of opportunity will vanish. Prices have started coming down.
- World wheat production is set to rise by about 4 per cent to 675 million tonnes in 2011-12 and oilseeds are forecast to rise 3 per cent to 317 million hectares. ABARES says the world wheat indicator (US hard red winter, fob Gulf) will fall by 19 per cent in 2011-12 to average out at US\$250 per ton.

Excellent crop conditions throughout the country supported by favourable weather and new crop arrivals will keep market under pressure in April and May. Arrivals have come down due to weeks end and holi. After Holi arrival pressure will build up. Crop in Punjab ,Haryana, U.P. is about to mature and harvesting is expected to commence at the end of this month.
