

### Oilseed Summary

*Oilseed prices feature downward pressure in the cash market consequent to new crop mustard seed arrivals and expected decline in export demand for soy meal. With South American exporters marketing new crop soy meal aggressively, demand for Indian meal continue to decline.*

### Spot Market Analysis: Rapeseed/Mustard Seed

*Weak sentiments noticed in the key mustard seed physical markets on good supplies and global cues on Tuesday.*

- The arrivals in Rajasthan are reported slightly lower at 3.7 lakh bags (85 kg each) compared to the previous day's level of 4.0 lakh bags.
- The seed arrivals are gaining momentum. However, it is yet to pick-up in *Hadoti* belt in Rajasthan.
- Slow down in the mustard oil demand has left the seed market with need oriented buying by the millers and stockists.
- Few stockists are waiting for the purchases in anticipation that prices of the seed will further fall by Rs 50 - 60/Qtl in a week of two.
- The millers are looking for the opportunity in mustard seed DOC exports with expected rise in crushing the seed in coming days followed by rise in supplies. India exports above 1000 tons of mustard seed DOC in the month of April.

*Mustard seed prices are likely to face downward pressure on new crop supply pressure. Higher output estimate continue to weigh on the seed prices.*

### Spot Market Analysis: Soybean

*Soybean prices continued downtrend in cash market on weak buying by the crushers and fall in international vegoil market.*

- The local solvent plant extractors are not keen in crushing the soybeans due to disparity on crushing.
- Poor exports in soy meal is contributing disparity in the crushing the beans. Currently, the disparity in crushing is recorded at Rs -420/MT compared to Rs -278/MT a month ago.
- Reportedly big crushers (1000 tons crush capacity per day) are operating their unit 10-15 days a month while smaller units (300-500 tons crush capacity per day) are running 15-30 days a month.
- Currently, the spread between Indian soy meal quotes (FAS Kandla USD/MT) and FOB Argentina is ruling higher at USD 17/MT which is above its two week moving average of USD 6/MT. Moreover, higher prices of Indian meal especially before onset of the shipment from Argentinean ports shall weight on the Indian meal prices as overseas demand is likely to shift amid higher price spread.
- Brazil is expected to produce a record 71.5 million metric tons this years said researcher of Safras and Mercados. The figure is higher than the 70 million forecast by the USDA in it's monthly World Agriculture Supply and Demand report earlier this month. Nevertheless, commencement of shipment from South American ports and any expected surge in production from Latin American nations shall add a pinch of salt to the international market sentiments.
- Brazilian farmers have sold 58 percent of their crop. The aggressive marketing by the Brazilian farmers is likely to boost the benefit before the commencement of Argentina's fresh crop arrivals in the market.

*Soybean prices will face downward pressure on the back of new crop arrivals in Brazil and Argentina, which is yet to pick-up. However, any fresh demand in soy meal, of Indian origin, for loading vessels in port, will lend support to the domestic soybean price.*

**SOYBEAN****Technical Analysis:**

- Candlestick chart pattern depicts buying support in the market.
- Prices closed below 9-day 18-day EMA, indicating bearish momentum in near and medium-term.
- RSI is rising in neutral region while stochastic is easing in neutral zone.

*The soybean prices are likely to improve in Wednesday's session.*
