

## Price Drivers

- Production estimate hiked, likely bonus for wheat farmers ,Export decision expected soon
- Favourable weather, huge carry in stock, Purchase tax increased in Punjab by one percent, higher yield expected.
- Procurement target increased to 26.3MMT.
- Export disparity from major growing states.
- IGC revised wheat production estimates up, Russia weather improved. Demand from Japan is likely to go up. Wheat crop infected in China.

## Analysis: Technical

- Candlestick formation shows strong sellers support in the future market with weak bias likely to continue in next trading session.
- Prices could not sustain at higher level due to all time higher crop estimation.
- RSI is moving down in positive zone indicating sellers support in the market.
- Wheat is likely to trade range bound with downward trend in next trading session. Players are advised to sell at higher level.

## Spot Market Fundamental

- Wheat market is likely to remain under pressure on bumper crop estimate. Haryana, Punjab and U.P. crop will directly impact the market sentiments. Possibility of export and expected bonus may provide some support if approved in time. But it may lower the size of procurement. Export parity is still a big issue in case of export from Punjab Haryana ,U.P., and Rajasthan.
- If India enters into export market, prices will come down in the overseas market . Export may be allowed in a phased manner on govt to govt basis. Govt may think of providing export subsidy when wheat is raised from major growing states. Picture is not very encouraging right now.
- The government has procured 4.72 lakh tonnes of wheat this year so far, which is lower by 52 per cent from that in the year-ago period, due to less arrival of the grain in Haryana and Madhya Pradesh. Food Corporation of India (FCI) had bought 9.87 lakh tonnes of wheat in the corresponding period of last year.
- The procurement ends in June. The government had procured 22.5 million tonnes in the entire 2010–11 marketing year (April–March). FCI expects the procurement to touch 26.2 million tonnes in 2011–12 as output is estimated to be a record 84.27 million tonnes in 2010–11 crop year (July–June)..
- The procurement ends in June. The government had procured 22.5 million tonnes in the entire 2010–11 marketing year (April–March). FCI expects the procurement to touch 26.2 million tonnes in 2011–12 as output is estimated to be a record 84.27 million tonnes in 2010–11 crop year (July–June).
- Punjab is projecting wheat production of 154 lakh tons as against 151.69 lakh tons last season. Haryana has revised its target to achieve wheat output of 115.09 lakh tons in current season, which will be almost 10 per cent higher than wheat production of 105 lakh tons. Area under wheat cultivation in Punjab stood at 35.15 lakh hectares, while in Haryana it is pegged at 24.75 lakh hectares. The wheat sowing area increased to 29.45 million hectares from 28.32 million hectares, the government data showed. India, the world's second-largest wheat grower, aims to produce 83.69 million tons of wheat in 2010-11, up 3.3% from the previous year.
- Global wheat production may rise by 4% to 672 million tons .As for India timing is most crucial given the high price of domestic wheat. While parity at the current levels is achievable, margins will evaporate as the global wheat prices decline and the window of opportunity will vanish. .World wheat production is set to rise by about 4 per cent to 675 million tonnes in 2011-12 . ABARES says the world wheat indicator (US hard red winter, fob Gulf) will fall by 19 per cent in 2011-12 to average out at US\$250 per ton.

**Revised production estimate, increasing arrivals and lower demand have supported downward trend to wheat market. Prices are likely to be under pressure despite export possibility and expected bonus for wheat farmers. Export may be allowed in a phased way and to lessen the burden of huge crop ahead. Traders are in wait and watch mood so far.**
