

Domestic Fundamentals:

Soy oil price witnessed steady tone followed by weakness in international edible oil market owing to temporary fall in global demand. According to Market sources, Lower crushing activity, diminishing stock at ports and improved prospects for demand from July to October; remain supportive drivers for the Soy oil. Reduction in Mustard oil availability and the consequent surge in price, also improve prospects for Soy oil. However demand may get capped at higher prices (Rs. 650 per 10 Kg.) Also the likely improvement in MOM Imports may also contain the upside. Ground nut oil Price remain upward surging in the spot market surging export demand for groundnut, reduces availability for crushing thereby pulling cost and leading to disparity.

International Market Fundamentals:

Malaysian palm oil continues to inhibit strength on upbeat exports data. China, import palm oil cargoes at higher prices compared to existing commercial stocks of the vegetable oil to cater for the upcoming summer peak in demand as put by the traders. Traders struck deals to buy refined, bleached and deodorized (RBD) palm olein. China will continue to import palm oil in the next two to three months. The commercial stocks have increased from last month's 300,000 tonnes to a current level of 450,000 tonnes.

Outlook:

Domestic edible oil price is likely to stay range bound and might see improvement in buying interest at lower price quotes which is likely to lend underlying support to the spot market prices going ahead.
