

Sugar & Gur Domestic Fundamentals:

- Steady to negative sentiments recorded in various spot markets of Sugar on Tuesday. Subdued demand and lackluster trade pressurize the sugar prices downwards. Buyers better believe to pull their hands in these bearish sentiments as falling prices will squeeze their profits.
- Mills registered less than half of the allowed export at 155,816 tonnes out of nearly 5 lakh tonnes. Highly competitive export market squeezes the profit margins from Indian millers.
- Gur prices are also reported steady on Tuesday. Gur arrivals is in its last stage in UP. As per trade expectation, gur prices may support to move up when arrivals are come to an end from UP.

Sugar International Fundamental:

In International market, increased supply scenario put some pressure on prices downwards in LIFFE sugar futures. Thailand, Cuba, Vietnam sugar production also supports the supply scenario.

Outlook:

Sugar spot prices are moving sideways to negative. We are expecting that the prices may go down further due to subdued demand and good arrivals in the markets. Overall good production scenario of sugar also pressurizes the prices of sugar in the coming months.
