### **Cotton Domestic Fundamentals:**

- Cotton prices remained steady to firm on Thursday with Amravati, Ahmedabad, Abohar and Kadi end steady, Muktsar ending in the green.
- Markets sentiments remained firm as cotton mills in the country have decided to bring down production • by 32%.
- Yarn cotton markets have also slipped due to higher yarn inventory pile up and limited exports.
- Millers demand will remain weak in the next week or so and this may pull markets lower.
- Separately, sources added that the Indian government is likely to allow further shipment of 1.5 million bales or 15 lakh bales in the current season which supports the current uptrend.

## **Cotton International Fundamentals:**

- U.S cotton futures moved higher as adverse weather conditions threatened crops in the U.S. and China.
- This could lead to tightening in global supplies.
- Separately USDA earlier said that about 57% of U.S. cotton crops were planted as of May 22<sup>nd</sup> 2011, down from 59% a year earlier.

### **Outlook:**

- In the short term, cotton prices may fall slightly on weak millers demand.
- Cotton futures may trade range to firm on drought conditions in the U.S and lower plantings in the U.S.
- In the long term price trend may depend on global production in U.S and India and demand from China.
