

Maize Domestic Market Fundamentals:

Mostly firm tone sentiment witnessed in domestic maize market on Wednesday.

- Sluggish market activities found in Bihar markets due to thunder storm during previous night has kept the arrivals on lower note.
- Reportedly, high moisture content in maize continued to keep purchasers inactive in Bihar market and continued bad weather not allowing farmers to go for drying of harvested maize produce to reduce the moisture content.

International Market Fundamentals:

- As per USDA's weather report, about 94 percent of the corn crop was planted as of June 5, up from 86 percent a week earlier and 99 percent a year earlier. And an estimated 79 percent of the plants had emerged from the ground, compared with 66 percent a week earlier and the five-year average of 90 percent.

Outlook:

We feel that prices are likely to remain range bound to firm on declining arrivals from major Rabi maize growing areas amid higher demand from poultry and starch industry. But the pre monsoon showers in the producing states disturbing active trade activities.
