

Cotton Domestic Fundamentals:

- Cotton prices remained mixed on Monday with Kadi, Ahmedabad Abohar ending in the green, Amravati and Muktsar ending lower.
- Prices were weighed down by higher anticipations of cotton acreage this Kharif 2011.
- As per the latest report of Ministry of Agriculture, as on 10th June 2011 sown area under cotton has increased by 40.4% compared to last year's area.
- Cotton has been sown in 21.65 lakh hectare as compared to 15.42 lakh hectare last year.
- It represents an increase of 6.23 lakh hectare over the last year's acreage.

Cotton International Fundamentals:

- U.S futures moved higher on speculation that production will drop in the U.S.
- USDA will release the official statement on June 30th 2011.
- Sentiments remained firm as acreage and production will be lower this year due to after drought in Texas and floods in areas along the Mississippi River damaged crops or delayed plantings.

Outlook: Domestic and International

- **In the short term, domestic cotton prices may trade weak due to higher acreage estimates and weak yarn manufacturers demand.**
- **U.S Cotton futures may trade higher on lower Chinese demand and lower U.S crop anticipations.**
