

### Wheat Domestic Fundamentals:

- Prices of wheat remained steady to firm on the news of export possibility. Govt may allow wheat export through private channel. Quantity for export is yet to be decided .
- There is no hope for improvement in international wheat prices as corn prices have come down. Both wheat and maize are used for animal feed. Stock in US and Russia is at higher side and with ongoing harvesting in US supply will increase in days ahead.

### Wheat International Fundamental:

- US wheat futures settled limit down at the CBOT under spillover pressure from exchange-limit losses in corn.
- Corn dragged down wheat as both grains are used as animal feed.
- Wheat is being loaded from Gujarat to south India and delivered at Rs 1370 per qtl. with a minimum margin of Rs 20 to 30 per qtl. are sourcing wheat at the rate of Rs 1050-1060 per qtl. locally. They pay freight charge at the rate of Rs 175 per qtl. for Coimbatore and Kottam.

### Outlook: Domestic:

- Wheat market may get support on possibility of export. However, with ample stock available in the market and with govt.'s stock one sided rally is unlikely. There is no parity for export at current international prices despite some improvement. Stock in US and Russia is at higher side and with ongoing harvesting in US supply will increase in days ahead.
