

### Wheat Domestic Fundamentals:

- Wait and watch mood of physical wheat markets ended with govt.'s decision on wheat and rice export during the week under review. Exports of wheat products, non-basmati rice and wheat have been cleared in regulated way.
- India may export rice to Bangladesh and African countries. Wheat export will take place on govt. to govt. basis. Next week quantity of wheat export for private trade may be specified after analyzing the international market scenario.

### Wheat International Fundamental:

- US wheat futures ended lower as the climbing dollar pressures prices. Traders worry foreign demand will drop as a firmer greenback makes US grains less attractive pricewise.
- The US already faces increased competition for export business from Russia. Russian farmers are expected to bring in a good harvest due to favorable conditions.
- Canada's agriculture department slashed its production forecast for wheat from 25.5 to 24.0 MMT

### Outlook: Domestic:

- Wheat market may get support on possibility of export. However, with ample stock available in the market and with govt.'s stock one sided rally is unlikely. There is no parity for export at current international prices despite some improvement.
