

Domestic Fundamentals:

Domestic edible oil market remained with firm sentiment on Wednesday as a result of poor selling activities against improved buying support. Limited arrivals amid steady demand from the retailers as well as stockists kept groundnut oil prices higher side. Mainly, Soy oil and palm oil prices in Hyderabad gained by Rs. 10 per 10kg as a result of prevailing higher demand from the retailers/stockists to meet the likely rising demand as Muslim holy festival Ramadan is nearing. Continuous rains from previous day in Hyderabad likely supported oil prices in Hyderabad. Trade sources feel that prices likely to remain range bound with firm bias for the medium term.

As India received good monsoon rains over the major oilseed producing regions during the week may boost oilseed crops which likely to ease the pressure on availability of oilseeds for crushing activities which in turn keep the prices of edible oil prices in check.

International Market Fundamentals:

Malaysian palm oil futures rebounded on Wednesday to 3082 ringgits per tonnes (gained by 42 points) as a USDA in its WASDE report released previous day showing tight grain stocks owing to rising bio-fuel use spurred concerns of tighter food supplies and corn stocks have hovered near 15-year lows for longer than expected due to its use to make ethanol, lifting vegetable oils that are also used in other competing renewable fuels. Meanwhile, trade sources feel that palm oil prices likely remain under pressure for the medium to long term as Malaysia having higher production cycle. Higher stock levels in Malaysia are expected to weigh on palm oil prices and may help importers to go for higher imports of palm products to meet the domestic requirement.

CBOT soy oil futures (Dec 2011 month contract) prices rose by 0.10 per cent to 57.32 cents/pound compared to previous day closing prices and higher supply forecasts from USDA limited advances in soy oil futures. USDA increased the world ending stocks of soybean oil by 4.20 per cent to 2.48 million tons. But the figures are lower by 19.22 per cent compared to the previous year ending stocks of 3.07 million tons.

Outlook:

Domestic edible oil price trend will remain range bound to firm in tandem with international market and likely catch up in demand to remain supportive in short to medium term. Reduced global oilseed production factor may keep the global edible oil prices in higher side for the medium term.
