

Pulses Domestic Fundamentals:

- Mixed sentiments witnessed in pulses markets.
- Since chana prices have improved by 11.40% (MP Chana in Delhi market) during last month and reached to season's highest level and this has made buyers cautious for buying chana at such higher levels, which is hinting for possible decline in its prices in near term.
- Desi peas prices have also improved by 3% in Kanpur market during last one month and possible decline in chana prices will also influence peas prices and peas prices might move with tandem to chana prices. Another supporting factor for decline in peas prices is that around 43900 tonnes of yellow peas are expected to arrive at Mumbai ports till July 26, 2011 and this will add to the supply pipeline, results in weakness in prices.
- Urad prices have fallen further in Madhya Pradesh due to the satisfactory sowing condition in the state as area under urad till July 14, 2011 is reported 3.54 Lakh hectares. Moreover, around 87 containers of urad have arrived from Myanmar during last couple of days and this will further weigh on its prices.
- Dull demand for tur and significant sowing progress in Maharashtra are restricting uptrend in domestic tur prices while sluggish demand for masoor have further reduced its prices in Kanpur market.

Pulses International Fundamental:

- As per the latest report released by government of New South Wales (Australia), area under chickpea during 2011-12 is estimated at 1.73 lakh hectares compared to the previous year's harvested area of 2.05 lakh hectares.
- Standing crop of chickpea is reported good in the region as germination and establishment have been reasonable for most crops and this will result in better chickpea output during 2011-12.

Outlook: Chana and peas prices are expected to fall due to weak demand at higher levels while prices of urad, tur and moong will take cue from rainfall activity and overseas price trend in coming days.
