

Domestic Fundamentals:

Domestic edible oil prices featured steady to firm tone on renewed buying ahead of Muslim holy month, *Ramadan*, coupled with seasonal demand. However, rising palm oil stocks at major producers like Indonesia and Malaysia may pressure domestic vegoil market. Meanwhile, margin for domestic sunflower crushing seems favorable for crushers but the imported sunflower is available at market in cheaper rate compared to domestically crushed sunflower oil.

International Market Fundamentals:

Argentina's 2010-11 soy production is seen totaling 48.80 million tonnes, down from a previous estimate of 49.6 million tonnes as a result of severe dryness. Argentine farmers finished the 2010/11 harvest last week and the government forecast means production slipped by 7.4 percent from last year's record high. Argentina is the world's No. 1 soymeal and soy oil exporter, as well as its third-biggest soybean supplier which may add further bullish support to soy oil prices as US adding support to prices on uncertainty about weather.

Malaysian palm oil futures bounced on Friday by 10 points to MYR 3141 per tonnes (Sept, 2011 contract) as a result firmer overseas markets and fresh talk of a dip in production lifted sentiment.

US Soy oil down by 0.32 points to 57.38 cents/pound as traders bought soymeal versus soy oil on spreads. Crushers were keener in soy meal export as it drew higher-than-expected export sales rather than soy oil.

Outlook:

Domestic edible oil price trend will remain range bound to firm and likely catch up in demand to remain supportive in short to medium term. Reduced global oilseed production factor may keep the global edible oil prices in higher side for the medium term.
