

### Wheat Domestic Fundamentals:

- Steady to weak sentiment continued to rule the wheat market on improved supply side. However, market participants are optimistic on price front and expect prices to go up on festival demands for wheat products in weeks ahead.
- Export option has gone now for milling grade and India has to wait for next export opportunity. Prices of wheat in domestic market usually remain on higher side during planting season and it would block export opportunity further. However if international market turns favourable export may possible.

### Wheat International Fundamental:

- World wheat market is expected to be unsteady on weather concern throughout the world. Worry over Canada crop increases, production estimate may be revised down. Demands for wheat and wheat products are likely to increase. Results of Egypt's latest tender Friday reminded traders of just how competitive the wheat market is and how US prices are overvalued in world export markets.
- Outlook: Domestic:**
- Wheat market may get support on possibility of export and declining arrivals. Market expects slight improvements in weeks ago in the international market.
