

Domestic Fundamentals:

Steady to weak tone witnessed in domestic edible oil market as a result of weakness from overseas markets and higher area under oilseed crop cultivation prompted selling tone. Bearish sentiment at domestic as well as international market kept buyers and sellers in dilemma situation during the trading session. Existing higher demand at domestic market keeping retailers to go for higher quantity purchases but the falling international markets amid prevailing higher prices of edible oils supporting them to apply wait and watch policy. Any sharp changes over the US and Malaysian futures likely to give better direction the edible oils for short to medium term.

International Market Fundamentals:

As per news source, edible-oil producers revealed that, Chinese authorities have sanctioned a rise in the retail prices they charge and prices on supermarket shelves of China for cooking oil are jumping by 5%. The permission to raise prices granted by the National Development and Reform Commission, the government planning agency of China to oil producers. Malaysian palm oil futures fall on Thursday's trading session and prices rose by 35 point to MYR 3101 per metric tonnes (Oct'11 month contract). Comparable vegetable oils lower on persistent global economic jitters and crude prices that flirted with one-month lows.

CBOT Soy oil futures dropped by 0.82 points to 57.06 cents/pound as traders remained cautious of extending recent gains as August rains during the crop's reproductive stage can quickly boost soybean-yield prospects.

Outlook:

Weakening stocks during prevailing higher demand condition in domestic market amid nearing line of festivities likely to keep edible oil prices in firm tone for the short to medium term. Prices likely getting impact of international market and any sharp movements likely to decide the price scenario of domestic market.
