

### Wheat Domestic Fundamentals:

- Wheat market recovered a little bit after continuous shed on back of renewed trading activities in various markets. Demand at lower level increased from feed millers and flour miller.
- However, lower maize prices may restrict further gains as wheat prices are still higher and it will contain demand from feed millers in weeks ahead.
- Wheat stock as on 1<sup>st</sup> August pegged at 358.75 lakh T in central pool, higher than required buffer norm of 171 lakh T and 30 lakh T.

### Wheat International Fundamental:

- World market is likely to remain bearish for short term on increased production forecast by IGC. IGC has pegged world wheat production at 674 million tonnes, almost 80 million tonnes higher than previous estimates..
- A lack of demand adds pressure to prices as the US continues to face stiff competition for export business from Russia.
- Egypt is seeking wheat after today's slide in prices and will likely buy from the Black Sea region

### Outlook: Domestic:

- Wheat prices are likely to remain subdued for short and medium term on higher stock against normal consumption and bearish international outlook.
