

Wheat Domestic Fundamentals:

- Cash and future market get some support due to speculators buying at lower level supported by possibility of export. Decision on export is likely to be taken soon as stocks are at all time record level.
- Besides, lower offtake from govt. stock is building up pressure to consume wheat through export. Experts say that quantity for non basmati rice export may be increased to two million tonnes while one to two million tonnes wheat export may be allowed.

Wheat International Fundamental:

- IGC has pegged world wheat production at 674 million tonnes, almost 80 million tonnes higher than previous estimates.
- US wheat futures surged on a variety of crop troubles and optimism about demand.
- Worries about spring wheat crop in northern Plains, hard red winter crop in southern Plains boost the market.
- Besides, as well as a delayed harvest in Europe supported wheat prices.

Outlook: Domestic:

- Wheat prices are likely to stay stable to firm on speculative buying and increasing possibility of export. International market is firming up and is expected to turn to be favourable for Indian export if allowed.
