

Pulses Domestic Fundamentals:

- Mostly steady to firm trend witnessed in cash pulses markets.
- Continuous rainfall in Madhya Pradesh and Maharashtra has raised the concerns for yield loss and quality related issues in new moong crop. However, tur is at vegetative stage in Maharashtra and rainfall at this stage will be beneficial for the standing crop.
- Commencement of new crop arrival of moong in Karnataka.
- As per the latest data release by the Karnataka Agriculture Department, the sown area under Kharif pulses this year as of August 30th, 2011 is down mainly because of less rain in bijapur at the sowing in June month. Therefore, this year sown area in the district is only 75,000 hectares whereas last year the sown area is 1,92,000 hectares.
- Tur has been sown in 7.27, Urad 0.85 and Moong 2.71 lakh hectares respectively as against the last year's sown area of 8.48, 1.19 and 0.83 lakh hectares.
- Latest updates as 30th August from Madhya Pradesh Agriculture Department, the sown area under Kharif pulses this year is 12.35 lakh hectares as compared to the 11.94 lakh hectares of last years. Moong has been sown in 1.77, urad 6.17 and tur 4.9 Lakh hectares this year in the state respectively as against the last year's sown area of 0.96, 5.85 and 4.87 lakh hectares.
- Upcoming festival season demand against the tight supply might support the further uptrend in the prices.

Pulses International Fundamental:

- The latest updates by Statistics Canada's the total productions of pulses are down marginally from the last year's production.
- Although the supply is estimated to increase because of the high carry-in-stocks. The marginal rises in the exports of peas are also forecasted.

Outlook: Demand for pulses is expected to remain good in coming day following forthcoming festivities which may support the prices in days to come.
