

Sugar & Gur Domestic Fundamentals:

- Mixed reaction witnessed in various sugar physical markets on Thursday. Meanwhile, weak demand seen in the Maharashtra as well as UP markets after having moderate festive demand.
- Gur price has decreased for both Chaku dry and wet varieties on Thursday. It is noticeable that Kolhus are ready to make fresh gur from new cane crop. However, recent rains put hurdles for making fresh gur. Consecutive 5 sunny days might help to start the gur production for 2011-12. However, recovery from new cane is not good as expected owing to moisture level is high in the new cane. Presently, Kolhus are willing to pay as much as Rs. 240/Qunital for cane to the farmers.
- Stock position for gur in Muzaffar nagar mandi stood at 500,000 bags out of which 290,000 bags belongs to Chaku variety while rest 210,000 bags belongs to Raskut, Khurpa and Papdi varieties. It is noticeable that stock position for gur was 650,000 bags previous year. Decreasing stock position of chaku gur and moderate demand of gur increase the gur prices.

Outlook:

Range bound movement witnessed in sugar prices. Higher sugar quota for September might ease the sugar prices initially as expected but expected festive demand afterwards might increase the sugar prices.
